TAKING THE GUESS OUT OF BUSINESS

By JOHN G. LONSDALE
President American Bankers Association

BANKERS and business men err in not adopting more universally the tactics of the scientist. When the scientist wishes to fathom the mysteries of the universe or resolve things into their component parts he calls to his assistance the magnifying power of the microscope. There before him, like an open book, lie the secrets of nature which unaided eyes cannot observe.

The uncanny power of the microscope's all-seeing eye has revealed countless secrets for the material and intellectual progress of humanity. It has enabled us to study the processes of growing cells in plant and animal life, trace the causes of disease and successfully combat the ills of mankind; it has aided the engineer in his search for stronger and more serviceable materials, giving us taller, lighter and more sanitary structures, and better highways; it has disclosed the defects in steel rails and brought us an era of safer railway travel; it has added to the food supply of the nation; in fact, it has affected favorably nearly every activity of the human race, whether it apply to production, distribution or consumption, in time of peace or in time of war.

In the business and banking world, economic research and analysis serve as the microscope through which we are enabled to see basic factors more clearly and thus determine the causes of success and failure. Only recently have we begun to realize the full value of research and analysis and apply them in such a way as to eliminate the guesswork that was characteristic of industry a few years ago. "Eliminate the guess and reach success," might well be a motto for all of us.

Banking Conducting Continual Research

The American Bankers Association is daily submitting every phase and every department of banking to searching scrutiny and study, says John G. Lonsdale, president of this the world's greatest financial association. The findings of these investigations are made available to the 20,000 members of the organization for their guidance.

"It is a fine tribute to the spirit of cooperation among bankers that it is able to carry on this work," he says. "Bankers from one end of the country to the other are constantly giving freely and unselfishly of their skill and experience so that the association may produce the truly great results that are being accomplished."

Statistical information on national and state banks, savings institutions, trust companies and trust departments, clearing house groups and general banking is prepared after exhaustive inquiry and distributed for the use of all bankers. The organization's investigations have resulted in the passage of beneficial legislation, revision of banking practices and innumerable changes for a stronger and more efficient banking structure. It has set up an educational system through its affiliated American Institute of Banking, where 45,000 ambitious young bank men and women are now availing themselves of the opportunity to advance in the banking field.

"It has been well said that the American Bankers Association, exclusive of the Federal Reserve System, has been the greatest single nationwide source of stability and improved conditions for banking in the United States," Mr. Lonsdale says.

Banking Grows More Complicated

DENVER, Colo.--The increase in the technicalities of the banking business in the past dozen years was shown by a speaker before the American Institute of Banking which held its annual convention here recently when he pointed out that in 1918, when the institute last met in this city, it gave only three courses, while today it gives 10, with more subjects in preparation. At the earlier date, he said, the curriculum of the institute consisted of elementary banking, commercial and banking law, and money and banking, whereas today it consists of banking fundamentals, commercial law, negotiable instruments, standard economic, standard banking, credits, investments, trust functions, analyzing financial statements, and public speaking, while the two new subjects of bank operation and organization, and bank management are to be added.

Goos to Portland. Loyd Moore, manager of the Oasis Theatre, left Sunday for Portland where he will spend several days.

The Best Show in Years
