FOR THE ELECTION

The people of Hermiston are to be congratulated on the election of its officers for the ensuing two years.

We feel though that a better taste would have been left if the sponsors of this ticket had come out from under cover in their sponsoring of various candidates.

And now that the election is over, the next thing on the program will be the tummy ache from that Thanksgiving dinner.

DOING THINGS DIFFERENTLY

Sometimes a difficult situation can be altered by the simple process of doing things differently from the way in which they have been done.

Chairman Legge of the Federal Farm Board said the other day that the feeding of wheat has become so general that it may absorb enough of the surplus wheat to affect prices in favor of the farmer.

If everybody who is feeding beef cattle or hogs would feed wheat, those who have tried it assure us they can produce more beef or pork per bushel of wheat fed than by feeding the same amount of corn.

The general feeding of wheat instead of or in combination with corn, through this winter, would do more for farm relief than any amount of new legislation could accomplish.

BUTTER-

"In Class by Itself"

"Butter is in a class by itself. It is one of the most easily digestible of fats and undoubtedly, when considering the oils and fats dietetically, is the best source of Vitamin A.

—M. E. JAFFA, Emeritus Professor of Nutrition, University of California.

Butter is indispensable in the diet of young and old. It contains Vitamin A, the growth promoting factor, also Vitamin D, which aids in assimilation of the minerals in other foods you eat. Butter builds bones, cells and tissues.
