Ford Shows Faith in Future by World Wide Construction Program

Top—The Ford plant at Edgewater, N. J., opposite New York City. Center—The new plant at Long Beach, Cal. Bottom—A model of the plant being built at Dagenham, England.

THE Ford Motor Company's faith in the future of business, and especially in the future of the automobile, is evidenced by the fact that it is spending more than \$60,000,000 for new plants and improvements in the United States and in foreign branches and associated companies. The company has nine new plants under way throughout the world, while plans are being formulated for several others not yet announced. Wherever possible the new plants are being located on sites accessible to both rail and water transportation so that, with economies of transportation supplementing the other, substantial savings will be effected. Five of the new plants are in the United States, as follows: Long Beach, California—This plant, recently completed to serve Southern

California, has a capacity of 400 cars a day. Operating at capacity it employs 2,600 men. Edgewater, New Jersey—The Edgewater plant, one of the company's largest assembly branches, has just been completed to serve New York City and surrounding territory. It has a capacity of 600 cars a day and employs 4,000 men. Richmond, California—Work was started recently on a plant at Richmond, to be completed next year. It will have a capacity of 400 cars a day and will employ 2,400 men. It will supply cars to the San Francisco area. Buffalo, New York—This plant will have a capacity of 400 cars a day and will employ 1,500 men. Seattle, Washington—A site has been acquired and plans for a plant are being drawn.

A new manufacturing plant being erected at Dagenham, England, eighteen miles from London, to supplant the present works at Manchester, will be completed next year. It will be the largest automobile factory in the world outside the United States. Its capacity will be 200,000 cars a year. An assembly and manufacturing plant is being built at Cologne, an assembly plant at Antwerp, and a service plant at Stockholm. Two branches—one at Perth, Australia, and one at Port Elizabeth, South Africa—were completed. In addition the Ford Motor Company is spending several million dollars to increase the power capacity of the Rouge plant at Dearborn, Mich., and several million more in miscellaneous improvements.
