DIVERSIFIED FARMING BROADCAST SUBJECT

(Continued from page One)

It is not only from the point of cutting the family food bills, however, that the vegetable garden deserves a place on every farm. So much has been said and written about vitamins during the last few years that practically everyone

knows they are essential to good health. Fresh, green vegetables are among the best sources of these invaluable vitamins, but entirely too frequently the farmer, busy with his money crops, feels that he has no time to bother with a garden even though his wife and the older children may easily be able to take care of it once it is ploughed.

A vegetable garden planted in health this winter after has been canned at the home and stored in the freezer. The farmer's family that has canned food-stuffs will be able to weather any economical storm.

Editorial

According to his admirers, the only thing that Mussolini hasn't been able to straighten out in Italy is the Spaghetti.

R. A. Brownson, Editor.

True Story

I was a pretty little house until I contracted a bad case of blister and scale. Then I became ugly. Finally my owner called in the Tum-A-Lum paint doctor and he fixed me up. Now, I am healthy, happy and easy to look at again. My advice to any sick-looking house is to get painted.

There is nothing strange in the fact that the modern girl is called a live wire. She carries practically no insulation.

The whitest white known to painters is Major White. Get an estimate on the cost of painting your home with a paint that will last for five years.

A. Soneson is doing some cement work for Cleve Clark, making turnouts, etc., in his irrigation system.

And speaking of insulation. For summer comfort insulate with FIR-TEX and enjoy a cool home this summer. It will make a difference of 20 degrees temperature.

Handi-Man is waiting to help your Spring Cleaning and painting.

And there is a difference between the North and the Poles. Just like is a world of difference between cheap and Tum-A-Lum. Try a coat of it.
