DAIRY GROUP MEET; ASSURE CREAMERY

(Continued from page One)

Linkage with the Interstate Creamery association, a national cooperative body, is contemplated by the group. A communication was read at the meeting to the effect that the national body could at present pay cash for shipments of butter, a condition that would help the Umatilla association to quickly reach a sound financial footing.

The Umatilla body will purchase stock in the national organization and ship its produce under the latter's supervision. This plan centers distribution and eliminates competition between cooperatives to a large extent, it is held.

Estimates of the cows available for the cooperative are in the neighborhood of 2500, scattered over most of the county's western end. Preliminary estimates of the amount necessary to raise by stock sales before operations can begin range from \$4000 to \$6000. About 60 percent of the dairymen in the district will join, it is indicated.
