CHRISTIAN SCIENCE CHURCHES
"Christian Science" was the subject of the Lesson-Sermon in all Churches of Christ, Scientist, on Sunday, June 28.
The Golden Text was, "Arise, shine; for thy light is come, and the glory of the Lord is risen upon thee" (Isa. 60:1).

Among the citations which comprised the Lesson-Sermon was the following from the Bible: "The people that walked in darkness have seen a great light; they that dwell in the land of the shadow of death, upon them hath the light shined" (Isa. 9:2).

The Lesson-Sermon also included the following passage from the Christian Science textbook, "Science and Health with Key to the Scriptures," by Mary Baker Eddy: "Christian Science is dawning upon a material age. The great spiritual facts of being, like rays of light, shine in the darkness, though the darkness, comprehending them not, may deny their reality" (p. 549).

NANCY CARROLL HAILED RANKING DRAMATIC STAR
A new Nancy Carroll, more dramatically real than ever before, is revealed to moving picture audiences by the red-headed star's latest dramatic portrayal in "Stolen Heaven," the Oasis theatre attraction for Sunday and Monday next. The versatility which "The Devil's Holiday" and

"Laughter" promised is realized in "Stolen Heaven." Here again she is seen opposite the blond Phillips Holmes, her leading man of "The Devil's Holiday."

The musical comedy and light romantic roles which introduce the vivacious young woman to motion picture audiences have been left far behind, and Miss Carroll takes her place with the true dramatic artists of the screen. In "Stolen Heaven" she gives deep meaning to a role actually taken from life. She reveals hidden resources for interpretation heretofore only hinted at.

CENSUS REPORTS FARM ACRES AND VALUES IN OREGON

According to a bulletin recently issued by the Bureau of the Census, there are 55,153 farms in the State of Oregon having a total acreage of 16,548,678, and a total value, including land, building, and implements and machinery, of \$673,413,678. These figures are given in detail for each county and minor civil division within the state. This is the first Federal census report to show these figures by minor civil divisions.

Of the total farm acreage 17.6 per cent, or 2,906,324 acres, was crop land on which crops were harvested in 1929: 7.0 per cent, or 1,154,744 acres, was crop land on which the crops failed to mature or were not harvested for any cause. Pasture land with a total of 11,378,824 acres, representing 68.8 per cent of the total farm acreage of the state, included 116,803 acres of plowable land, 2,619,478 acres of woodland, and 7,942,543 acres of other land. In addition to the land cropped and pastured, the total land in farms included 502,737 acres of woodland not used for pasture, and 494,598 acres not in forest, pasture, or crops, including the land occupied by house yards, barnyards, feed lots, lanes, roads, etc.

The total value of farm land and buildings was \$630,827,927, of which \$128,881,093 represented the value of all farm buildings, including the farmers' dwellings, which were valued at \$72,627,906. The value of farm implements and machinery, including farmers' automobiles, was \$42,585,751.

FOREST SERVICE CURTAILS NATIONAL TIMBER SALES

In line with the policy approved by the President, the U. S. Forest Service has ordered temporary restriction of sales of timber from the national forests, as a means of relieving the serious depression now confronting the lumber industry.

Regional Forester C. J. Buck has received from Chief Forester R. Y. Stuart instructions, effective immediately, to make no sales of national forest timber during the present economic situation, where the value of the timber sold is in excess of \$500, except under the following conditions:

1. To supply the needs of already existing sawmills which are dependent upon the national forests for their raw material and where such raw material can not be obtained elsewhere.
2. To furnish domestic paper mills with raw material needed to supply

the domestic market with newsprint and other wood pulp products.

3. To dispose of wind-thrown, fire-damaged or fire-killed, and bug-infested timber.

These exceptions are designed to avoid causing unnecessary unemployment or unnecessary hazard to the forests.

No restriction is placed upon small sales amounting to less than \$500, which usually involve special material directly obtainable from the national forests and utilized locally. In 1929, more than 13,500 sales from the national forests were for sums less than \$500.

GAYNOR-FARRELL AT OASIS TODAY AND TOMORROW

Janet Gaynor and Charles Farrell, the screen's most popular sweethearts, are re-united in a Raoul Walsh's Fox Movietone production of "The Man Who Came Back," which opens Thursday at the Oasis theatre July 2-3-4.

"The man Who Came Back," one of the most powerful romantic dramas ever written, presents Miss Gaynor and Farrell in the greatest roles of their co-starring careers.

Farrell, as the ne'er-do-well son of New York's king of finance, falls from grace. Not properly trained to face the world, he sinks, step by step until he finally reaches the lowest dive in Shanghai.

There, drawn by natural forces, he is attracted to a girl one rung above himself in degradation. Together, hand in hand, impelled by their new found faith, their courage is reborn in misery. Clinging to each other, they climb to a seventh heaven through love.
