Editorial

Don't blame a successful man for bragging a bit — no one with a good catch of fish ever goes home by way of the back alley.

R. A. Brownson, Editor.

Longhorn & Son have built a nice kitchen cabinet for Mrs. Wilson of Boardman. Those who fail to take advantage of the present low prices of building materials and repair and repaint their homes are much like the man who went to the Sahara Desert to get rocks to build a rock garden in the Rocky Mountains.

A house that cost \$3,000 to build two years ago can now be built for about \$2,250. Some saving, eh what?

A young Swede appeared at the court house and asked for a license. "What kind of a license?" asked the clerk. "A hunting license."

"No," was the answer. "Aye tank aye bane hunting long enough. Aye want a marriage license."

J. H. Reid is taking out material for a new chicken house 120 feet long.

The hunting season isn't far off. We mean the game hunting sea-

son. Better get all of those little repair jobs done around the house so that they won't interfere with Chink and Deer hunting this fall.

And our Handi-Man service is still functioning properly. Give it a trial.

Summer is hot. Winter is cold. Time does fly. We soon get old. Order your coal while summer is here. Then winter's ice will hold no fear.

Call 331 and make arrangements for getting in the winter's supply of fuel, now.

TO THE LADY OF THE HOUSE . . .

What are your working hours? Have you some time to yourself?

The average woman spends 51.6 hours each week on work connected with the home. More time than the 44-hour week which is generally established in business! And many women average 10 and 12 hours each day.

Many industrial workers remember the time when factory hours were from 6 in the morning until 6 at night, six days a week, with one-half hour for lunch. By taking advantage of labor and time-saving inventions, industry has reduced its working time.

So can the homemaker. The electric washer, the electric iron, the electric range, the electric dishwasher, the vacuum cleaner, and all the other electrical appliances for use in the home, not only make your work easier and save your health, but cut down the time required to do the same tasks in the "old" way.

"Can I afford them?" you probably ask. The real question is "How can you afford to do without them?"

The modern home is the electrified home, where homemaking does not take up the major part of a woman's time, but leaves her enough time and energy to do some of the things she merely wished she could do before.
