WITH FARMERS AROUND THE STATE
KLAMATH FALLS — The total harvest of small seeds in Klamath county this year will exceed 100,000 pounds, which is more than twice the amount produced in this county in any previous year, according to records kept by County Agent C. A. Henderson. Included in this is 20,000 pounds of Kentucky blue grass seed, the first to be harvested in Klamath county, grown by Geary Brothers of Wocus.

LAKVIEW — Because of the shortage of feed and pasture, Lake county farmers are cutting various weeds for hay, reports County Agent Victor Johnson. More than 500 tons of weeds and foxtail have been stacked for feed on the old Goose Lake bed by farmers in the East Side and Dry Creek districts, he says. An alkali weed found in this section and identified by the Oregon Experiment station as Sea Britie, is readily consumed by sheep and cattle.

CORVALLIS — B. W. Johnson, prominent fruit grower of Monroe, started dusting his prunes for the prevention of brown rot several years ago, and his crop has been free from this disease ever since, says C. R. Briggs, county agent. Other Benton county fruit growers are also reporting excellent results from dusting for the control of brown rot.

KLAMATH FALLS — Rape for summer pasture is proving particularly heavy yielding in the Tule Lake section of Klamath county where it was tried for the first time this year following the recommendations of County Agent C. A. Henderson. It seems to have a tremendous carry-

club member in the Stanfield and Hermiston projects. Dr. F. V. Prime, Oregon Hardware & Implement company, Rohrman Motor company, and The Hermiston Herald donated toward the purchase of the calf.
