:SOCIETY:

Miss Caroline Cromer of Walla Walla, Wn., and Miss Constance Miller of Spokane, Wn., house guests of Miss Ruth Dodd, were the inspiration for a slumber party at the Dodd home Tuesday night. Several girls of the younger set enjoyed the evening.

The Misses Betty and Charlotte Ralph entertained Wednesday afternoon at the home of their aunt, Mrs. W. J. Warner, in honor of Susan Campbell of Portland, Oregon, grand daughter of Mr. and Mrs. Thos. Campbell. The guests included Miss Ruth Dodd and her two house guests Miss Caroline Cromer of Walla Walla, Wn., and Miss Constance Miller of Spokane, Wn., Misses Carrie Lage, Anna Ray Martin, Neva and June Richards, Marie Lou Stephenson, Betty, Charlotte, and Helen Ralph, and the honoree.

As a means of preventing a repetition next spring of one of the worst infestations of pea weevils in Oregon for years, an appeal has been sent out by A. O. Larson, federal entomologist stationed at Oregon State college, for growers of garden plots as well as commercial growers of field peas to clean up their patches as soon as possible after the green peas have been picked or harvested.

An extensive inspection over the state by entomologists indicate that the heavy infestations of weevils this year has left few fields of peas or even gardens unaffected, particularly in the Willamette valley.

Mr. Larson recommends that all vines in garden plots be gathered and burned as soon as the peas begin to harden and ripen, or that particular care be taken in picking all the dry peas. The ripe peas may be fed to chickens or hogs, before the weevils have a chance to come out. Field peas, according to Mr. Larson should be harvested as soon as possible and fumigated, and the stubble burned.

The weevils, if allowed to emerge, will hibernate in trees, around fence posts, under shingles, bark or moss until next spring when they will lay eggs on the pea pod. The larvae then will eat their way into the green pea and complete their growth.

Peas containing weevils usually have a little black mark on the outer surface.

Official figures given in the report show that 224,780 cows were milked in 1929, the total production being 135,379,000 gallons of milk. Manufacturers included 22,431,000 pounds of creamery butter, 12,894,000 pounds of cheese and 29,626,000 pounds of condensed and evaporated milk.
