VOLUME XXVI NUMBER 49

HERMISTON, UMATILLA COUNTY, OREGON, THURSDAY, AUGUST 4, 1932

SUBSCRIPTION, \$2.00 PER YEAR

ROUTE FOR TURKEY TOUR OUTLINED BY GENERAL COMMITTEE

TURKEY EXPERIMENTS WILL BE EXPLAINED BY H. K. DEAN.

Group Will Visit Four Farms; Tour To Terminate at Columbia Park For Picnic Dinner.

The annual turkey tour sponsored by the Eastern Oregon Turkey Growers' association will be held Saturday, August 13, according to announcement made by the committee on arrangements following a meeting Tuesday.

The tour will start at the old experiment station with Superintendent H. K. Dean of the Umatilla Experiment Station giving results found by experiments made in the past year. Three other turkey growers' farms will be visited including the Harry Kelley, H. G. Rankin, and Logan Todd farms.

Last year growers expressed the desire to make the affair annual and at a recent meeting the association went on record as sponsoring the turkey tour every second Saturday in August each year.

Growers see new ideas put into use and tried successfully when the turkey farms are visited and many of these are passed on to other growers who are not so experienced. Many backward steps are prevented for those who are starting in the turkey raising business by these tours of inspection. Questions are asked and problems are discussed.

Immediately following the tour a picnic will be held in Columbia park to which all turkey growers and their families and friends are invited, whether they have participated in the tour or not. The turkey growers association also gave a special invitation to all poultry raisers who would like to attend. Roast turkey, coffee, cream and sugar, and ice cream will be furnished but each family should bring their own picnic lunch which will be placed with many other family picnic lunches on a long community table. Each person will furnish his or her own cup, plate, knife, fork, and spoon.

Director Paul DeMaris of Corvallis has been asked to attend the turkey tour and picnic, as well as other state men who are interested in that line of industry.

The committee making arrangements for the turkey tour include: Garnet D. Best, Emmett Cooney, Guy Cronk, L. F. Wooster, Lyle Tilden, and Mrs. Wm. Hinelein.

PROSPECTORS AND SCHOOL TEACHERS FINED FOR FIRES

Four prospectors and four school teachers in the Siskiyou national forests have been arrested and fined for violation of federal or state fire laws, is the report just received by regional forester C. J. Buck.

Joseph Jensen, prospector, Klamath Falls, became lost from his party in Del Norte County, Calif., built a signal fire and left it unextinguished. The fire spread, covering 3,000 acres, with damages and suppression costs of \$6,000. Jensen was arrested and taken to Crescent City where he was fined \$10.

Lee Gerber, prospector, Ilaha, Oregon, threw away a cigarette which wasn't out. He was arrested, tried at Agness, Oregon, and fined.

William Bryant, prospector, Port Orford, Oregon, burned brush in the closed season without a permit. His fire got away and cost \$300 to put out. Bryant was arrested, tried at Myrtle Point, Oregon, and fined \$25 and costs.

Robert H. Smith, prospector, Gold Beach, Oregon, left his camp fire unextinguished and unattended while he looked for gold. He was arrested, taken to Mule Creek and fined \$25.

Buel Beckham, Don Beckham, Paul Luy and Francis Neff, teachers, all of Bandon, Oregon, spent their vacation near Ilaha on the Rogue River but apparently did not know enough to put out their campfire. The forest rangers were away at the time. Local settlers requested the teachers to put out their camp fires and later reported the violation to the rangers. Buel Beckham took the blame, was tried at Port Orford and fined \$15.

OREGON STATE FAIR OFFERS FREE GRANDSTAND

The new concrete and steel grandstand at the State Fair grounds costing \$150,000 is one of the finest of such buildings in the West. The building is unpaid for and it was the intention that receipts from racing should pay for the building. However, during the past two years approximately an average of three-fourths of all the immense seating capacity of this building has been vacant, while thousands of people were out on the grounds without a place to sit down. Guards were hired to keep them out of the vacant seats.

This year general admission to the grandstand will be free, with only a slight charge for loges and reserved seats. A free grandstand is a new departure for State Fairs, but is deemed very timely for this year. Fair attendance will be much larger when one admission ticket admits to both the grounds and the grandstand. In spite of times, people crave some amusement and diversion. This year people are looking for their money's worth in every line and there is no place along this line where so much can be had for the money as at the State Fair.

The operating cost of the State Fair has been reduced drastically and this reduction should either be passed on to the patrons of the Fair in the way of lower admission charge or by giving them more for their money. The latter course will be taken. Considering that only a small per cent of the total attendance of the Fair ordinarily pays admission to the grandstand, it is apparent that grandstand attractions ordinarily selling for \$1.00 a seat can be financed by a small fraction taken out of each ticket. In this way everyone can see a high quality program, and the cost of these attractions per capita is reduced to a very small fraction on account of the fact that so many more are seeing it.

WITH FARMERS AROUND THE STATE

Treatment Controls Blight.

GRANTS PASS—Use of the California zinc chloride method of controlling pear blight has apparently proved successful on the H. G. Hoffmaster place where he has used it in his orchard for three years. County Agent Herb Howell reports the treatment unusually effective in checking blight on both limbs and roots. He is convinced of its value and is recommending it to other pear growers in his county.

ENTERPRISE—The plan of swine sanitation put into effect in this county more than a year ago is proving highly satisfactory in operation according to an investigation just made by H. A. Lindgren, livestock field man of the extension service. He found farmers that are using this method are well pleased as they are getting much better growth with fewer losses than before. A plan for improving the quality of hogs raised in this county by importing purebred boars is now being considered.

REDMOND—Many methods of combating noxious perennial weeds are being followed by farmers in this territory this year. Standard chlorate spray treatment is being used in many instances, but other "home made" remedies are also in use, such as flooding Canada thistle for several days after cutting and spreading straw or manure over quack grass or white top to a depth of one to two feet and then burning it after it has remained there for several months. Both these have proved highly successful, reports County Agent Gus Haglund.

CORVALLIS—A system of overhead irrigation for pasture land which is said to be well suited to uneven ground such as is found in western Oregon river bottoms, is proving successful this season on the Frank Hall farm near here. This system, installed through the cooperation of the Oregon Experiment Station and County Agent C. R. Briggs, is being used by Mr. Hall to irrigate 16 acres with a supply of water amounting to only about 70 gallons per minute. Cost of equipment was \$650, which is considered exceptionally low for an overhead system.

AMERICAN LEGION AND AUXILIARY NOMINATE OFFICERS

At a meeting of the American Legion Auxiliary last Thursday night at the home of Mrs. B. S. Kingsley, officers for the ensuing year were nominated. They were: Mrs. Wm. Shaar, and Mrs. A. W. Christopherson, president; Mrs. Geo. Story, Mrs. E. McPherson, first vice president; Mrs. Garnet D. Best, second vice president; Mrs. Peter Castrie, Mrs. O. K. Mudge, and Mrs. W. L. Hamm, secretary.

Legion officers nominated recently to be voted on Thursday night, August 4, are: Al Clayton, post commander; Garnet D. Best, vice commander; James Todd, adjutant; O. W. Payne, chaplain; and Peter Castrie, sergeant-at-arms.

Mrs. Lyle Tilden was elected as delegate to the state department convention in Portland September 9-10, preceding the opening of the national Legion convention September 12-15.

INSTRUCTIVE DEMONSTRATION GIVEN BY 4-H GIRLS CLUB

The 4-H club girls of the We-Can Canning club held a demonstration and silver tea Wednesday afternoon at the J. S. Burnham home. Grace Rodda and Rosella Matott demonstrated the making of pectin and explained the fruits containing the most pectin.

Numbers included in the program were as follows: Clarinet solo, Edith Clarke; Vocal duet, Marjory and Mary Burnham; Talk on the history of the club by Mary Skovbo; Reading, Jane Jackson; Dance, Rosella Matott; Piano duet, Lottie Knauf and Lois Hutchison.

The club is under the leadership of Mrs. Wm. Hinelein.

Walter Botkin Seriously Ill

Word has been received here from Walter Botkin, who is in the Veterans' hospital in Walla Walla, that he is in a serious condition. Physicians have been unable to operate because of Mr. Botkin's weakened physical condition but were unable to find anyone giving the right blood test for a blood transfusion. Twelve more men were selected by Legion officials Wednesday to try for the proper blood test. If Mr. Botkin can be built up sufficiently an operation will be performed. Mrs. Botkin went to Walla Walla Monday to be with her husband.

Edith Fraker Accepts Nomination

Edith M. Fraker who resides near Holdman and whose postoffice address is Pendleton, has filed with E. B. Casteel, county clerk, the notice of her acceptance of the nomination by the voters of this county, as an independent candidate for the office of county school superintendent. She has taken as her slogan, "Service with Economy."

STATE POLICE WILL GIVE AUTO LICENSE EXAMINATIONS HERE

DATES WILL BE ANNOUNCED BY SECRETARY HOSS LATER.

The Oregon Motorist's Manual Now Available at Herald Office; All Licenses Expire in 1935.

"Examinations for operators and chauffeurs licenses will be given in Hermiston in the future," says O. O. Felthouse, president of the Hermiston Commercial club, "and definite dates will be set sometime within the next two weeks." This information was given out after a letter had been received from Secretary of State, Hal E. Hoss, stating that the wishes of the Hermiston people to take automobile and chauffeurs license examinations locally, had been granted.

Secretary of State Hoss forwarded a supply of the Oregon Motorist's Manual to Mr. Felthouse, which are available at the Herald office. This pamphlet has been compiled especially for those wishing to prepare themselves for the examination given to applicants for licenses to drive. Everyone in Hermiston who desires a license to drive should secure one of the booklets and study the questions therein. Even those already holding a drivers license will benefit by studying this manual as all present licenses expire in 1935.

Hermiston people will be saved considerable extra expense through this arrangement, in not finding it necessary to make a special trip to Pendleton whenever a drivers or chauffeurs license is desired. Secretary of State Hoss has been very courteous in the matter and dates for the examinations will be announced later.

Attend W.C.T.U. Convention

Mrs. C. A. Paul and two daughters, Ethel Louise and Dora Lee, left Thursday for Seattle where they will visit Mrs. Paul's parents, Mr. and Mrs. Edward Gould, prior to the opening of the national W.C.T.U. convention to which Mrs. Paul is a delegate from Umatilla county. She is acting as alternate for Mrs. Esther A. P. May of Pendleton who is unable to attend. Mrs. Paul is president of the local Woman's Christian Temperance Union. They expect to be gone about three weeks.

Weather Report.

Date	Max.	Min.
July 28	96	61
July 29	80	53
July 30	77	55
July 31	85	50
August 1	87	56
August 2	94	48
August 3	100	47

MORROW COUNTY FAIR DATE SET AHEAD TWO WEEKS

The Morrow County Fair board found it necessary to change the date of the fair this year from September 2-3 to 16-17, because of a conflict with the Heppner rodeo. Premium lists will be available within the next two weeks.

The fair will be held at Irrigon this year instead of Boardman. Officers are Mrs. W. C. Isom, president, Harvey Warner, treasurer, and Mrs. C. Coats, secretary. The board of directors include Mrs. A. C. Houghton, George Wicklander, Ingard Skovbo, and Frank Brace.

ROAD COMMISSIONER DECIDES TO TAKE UP OLD DUTIES

Portland, Aug. 4—Leslie M. Scott today resumed his place as chairman of the state highway commission, withdrawing the resignation he tendered July 18.

In a letter he addressed today to Gov. Julius L. Meier, Scott said: "Responsive to the request of Mr. Washburne and Mr. Aldrich (other members of the commission) which you have so kindly approved and the wishes of many citizens who have urged me to consent, I place my services at your disposal for the uses of the state and your administration."

Governor Meier expressed pleasure that Scott had reconsidered. He said he had nothing to add to what already had been said by him in appreciation of Scott's services. The governor stated he had never accepted the chairman's resignation, hence a reappointment is unnecessary.

Scott's letter was released after a conference with the governor at the latter's summer home at Menucha. —East Oregonian

Celebrates 82nd Birthday.

Mrs. D. H. Knode celebrated her 82nd birthday Sunday at the home of Mrs. M. C. Barager who gave a dinner in her honor. Invited guests were Mr. and Mrs. Knode, Mr. and Mrs. Chas. Hogard, of Stanfield, Mr. and Mrs. Ebert, Mr. and Mrs. O. Loeridge, Mr. and Mrs. J. S. Burnham and daughters Marjory and Mary. Mrs. Knode is Mrs. Burnham's mother.

Leave On Eastern Trip.

Mr. and Mrs. J. H. Quiring and son Elvin of Dallas, Ore., came through Hermiston Monday enroute to Mountain Lake, Minnesota. They were joined here by their son, Alfred Quiring, who will make the trip with them. Leander Quiring will assist in the Herald office during Mr. Quiring's absence. They plan to be away about three weeks and while in Mountain Lake will attend the wedding of their son and brother, Jake Quiring, who will be married August 10th.

SALTING GOOD PLAN FOR PRESERVING VEGETABLES

That "salting is an economical method of preserving the surplus beans of the home garden is pointed out by the Home Economics division of the Extension Service. Vegetables such as beans, cabbage, beet tops and turnip tops, may be salted in three different ways—by dry salting with fermentation, dry salting without fermentation and by the strong brine method.

Dry salting with fermentation is the most popular method, according to home economists of the extension service who explain it as follows:

Use 3 pounds of salt (coarse or fine) for each 10 pounds of vegetables. Cover the bottom of the container with one inch layer of vegetables and over that sprinkle a little of the salt. Desirable containers are stone crocks, hardwood kegs and glass jars not suitable for sealing. Repeat the alternating layers of vegetables and salt until container is about three-fourths full. To the top layer add remaining salt and over it spread a piece of muslin or three thicknesses of cheesecloth. Tuck the cloth in at the sides and weight it with a board or plate.

Place the container in a moderately warm room. If a brine does not cover the vegetables in about 24 hours, add heavier weights. When bubbling stops, fermentation is complete. This may take from 8 to 30 days.

Store container in a cool room. Remove cloth and any scum or mold. See that brine comes up to, but not over, the cover. Cover the surface of the brine with melted paraffin. When vegetables are used from the supply or when the paraffin breaks from moving the container, remove, remelt and replace the paraffin.

Before using salted vegetables, rinse them in fresh water and cook them. They may be soaked in fresh water to remove some of the acid taste.

WORLD WHEAT LESS, SAYS CROP REPORT; PIGS YEWER

World wheat supplies available during the summer and fall months are expected to be considerably smaller than a year ago, says a market report of the O. S. C. extension service. The carryover is smaller and the new crop less than last year in the Northern Hemisphere.

Production is expected to be smaller in Europe as well as in North America, according to the report. Production in the whole Northern Hemisphere is now expected to be around 200,000,000 bushels less than a year ago and carryover about 15,000,000 bushels smaller.

"Practically all of the reduction in the prospective supplies of wheat in the Northern Hemisphere is accounted for in the United States," the circular states. "The winter wheat crop in this country is so short that the total wheat supply is expected to be around 200,000,000 bushels less than during the year ended June 30, despite increased carryover and a much larger spring wheat crop than last year."

I.I.O. Picnic Scheduled

The I. I. O. organization picnic has been scheduled for Sunday, August 14, in Columbia park according to announcement made by the president B. S. Kingsley. A picnic pot luck dinner will be enjoyed and the organization will furnish ice cream and coffee. Members voted to include former residents of Missouri and Wisconsin in this year's list along with those Iowa, Indiana, Illinois, and Ohio residents. Mrs. J. M. Prindle is secretary and J. H. Reid vice president.

Wheat Yield Below Normal.

Joe Hawkins, wheat farmer owning land north of Pendleton between Pendleton and Helix, was in town Saturday with a load of first cutting wheat. Mr. Hawkins says that the wheat yield is about 60% normal and that some sections are badly infected with smut. His wheat "scaped smut due to the variety, Albeit wheat, and spring seeding. It is said that there is a lot of smutty wheat in the country this season.

W. W. Felthouse, Otto C. Pierce, and Merle Potter went to Celilo Falls salmon fishing early Thursday morning and returned late that night.

STATE-WIDE CAMPAIGN ADVERTISING OREGON PRODUCTS OPENED

NATIONAL LEGION CONVENTION WILL BRING 75,000 VISITORS.

State Department, American Legion, Outlines Program to Advertise Oregon-Grown Products.

The American Legion, department of Oregon, is making a statewide campaign to advertise Oregon-grown products during the National American Legion convention in Portland, September 12-15, according to instructions received by the local Legion post.

Seventy-five thousand visitors will be in Oregon during the convention who will remember Oregon, not by the names of its most important cities, but by the products grown in that particular vicinity. The department plans to put out a four-page folder which will be sold at 10% less than cost to all restaurants and hotels who will cooperate in this great movement of advertising Oregon-grown products.

On the first page of this folder will be a map of Oregon showing the larger cities in the state and naming the most important agricultural products grown in that community. The idea is not to feature any certain community but carry out the idea of impressing Oregon-grown products such as prunes, apples, lamb, turkey, etc., on the minds of visitors. The second page will carry other advertising data and the third page is left blank in order that menu sheets carrying menus made up from Oregon-grown products, may be clipped on the folder. The fourth page is left blank for the use of local commercial clubs or other civic organizations in advertising agricultural products in their community.

With 75,000 visitors in the state, following the harvest season, the greatest opportunity for advertising Oregon-grown products presents itself. The advertising campaign will succeed only by the cooperation of each individual community because with these 75,000 visitors in the state, there is not a community that will not be touched by some portion of the visiting convention delegation.

Commercial clubs and business houses have been urged to use the display space in vacant store buildings to show Oregon-made and Oregon-grown products. The local post of the American Legion will assist local hotels and restaurants in outlining their program for advertising.

ALONG THE CONCRETE

Eating apples are on the market, say those of the medical profession, when they look at their date books.

T. G. Gregory of Stanfield came near disaster Tuesday when matches in his hip pocket ignited from friction while he was sitting in his car on the Main street in Hermiston. Had the flames not been extinguished immediately Mr. Gregory might have been embarrassed because he had no coat to cover the loss.

We aren't surprised by the announcement of the Princeton university scientists that a woman can kill yeast cells by simply looking at them. In fact, we have seen such a yeast cell.

The joy of "taking unto himself, a bride" was fully realized by Henry Harger Wednesday night when all the high school students who are not out of town this summer, showed him how to take his bride for a ride in a wheelbarrow. What part the school superintendent played in the plot still remains a deep secret but everything seemed to go off pretty smoothly. Harger may have thought he was seeing "Sky Bride" as he witnessed the waiting line outside the drug store and saw the ice cream cones doled out to the "young vagabonds."

Believe it or not. We heard Harry McMillan say that he had a ton of coal chucked away in the coal bin already. And to find it necessary to think of coal these hot days. Phooey!

A Stranger in These Parts
