25% INCREASE In Instruction Costs!

Will Result if the Proposed Zorn-Macpherson School "Juggling" Bill is Allowed to Pass!

The costly experience of 18 States, which have combined institutions, should be heeded by the people of Oregon in considering the so-called consolidation measure, which actually is only a costly and unneeded expansion, establishing 4 NEW schools and creating 2 NEW types of schools at taxpayers' expense. The following graph, which is compiled from the authentic figures of the United States Office of Education for the school year 1931-32, will enable every taxpayer to prevent this increase in instruction cost, resulting from an experiment proposed by unknown interests.

IS THIS ECONOMY?

FIGURE (A) represents the present average low cost of instruction per student in Oregon. This cost is being continually reduced as a result of a unified system of instruction and management, which is now being operated at an annual saving of \$900,000 compared with previous costs.

FIGURE (B) represents the average instruction cost per student in the 17 States having separate institutions.

FIGURE (C) represents the average instruction cost per student in the 18 States which have combined institutions.

IF OREGON is forced to combine the University of Oregon with the Oregon State College, there would be an increase in instructional costs of \$90.00 each year per student, or over \$450,000 ADDITIONAL INSTRUCTION costs for a combined student body.
