Miss Marjory Hutton returned Saturday from Ukiah where she has been working in the Big U packing plant for the past three months.

HIGH SCHOOL GIRL WINS PASSES TO THEATRE ON ESSAY.

An essay written after seeing "Bring 'Em Back Alive", featured at the Oasis theatre last month, supplied Miss Edith Clarke with several passes to other shows at the theatre. The picture was educational and all high school students were dismissed that they might witness the picture.

The winning essay follows:

Why I Liked "Bring 'Em Back Alive"

"Bring 'Em Back Alive" appealed to me most from the standpoint that, for the first time, I had an opportunity to view scenes depicting jungle life as it really is.

"To me, the constant danger of attack by jungle animals, and the ever present danger of disease seemed to create obstacles unsurmountable by any human. Yet, the dogged determination and endless patience which characterize the personality of Frank Buck were the chief factors by which man was able to "Bring 'Em Back Alive" and give to the public some idea of jungle life that was real—not fictitious.

"Before viewing the picture, I had no knowledge of the methods employed in capturing the animals. Gaining knowledge of this, in itself, was educational as well as very interesting.

"Specimens of the jungle reposing quietly in cages may be seen in zoos throughout the country. However, this can hold no comparison with seeing on the screen an animal ready to pounce upon his prey. Then a terrible struggle ensues, and oftentimes a battle to the end.

"When people neglect the opportunity of seeing such a helpful and as interesting a show as "Bring 'Em Back Alive", they are missing something well worth time and effort."

pect to give at the Farm Bureau meeting at Alpine next Saturday night. After this Farm Bureau meeting will be a basket social to raise money for Christmas candy.

Church was held in the Pine City auditorium Sunday evening with Rev. Saunders of Portland preaching the sermon. The Misses Gertrude Tichner and Reitha Howard sang a duet.

Growing Christmas Holly.

A new and timely farmers' bulletin, "Growing Christmas Holly", has just been issued by the Forest Service, U. S. department of agriculture.

This 21-page publication covers the practical phases of growing holly for commercial use. It deals with suitable soil conditions, proper species, how to propagate from seed, from slips and by grafting, transplanting, cultivation, harvesting, and shipping. There are 12 illustrations. The bulletin was prepared by Perkins Colville, U. S. forest service. Copies are not obtainable free but are for sale by the superintendent of documents, Washington, D. C., at five cents each.

BE CERTAIN OF MUSHROOMS BEFORE EATING, IS ADVICE.

"There just isn't any such universal mushroom rule," is the answer that H. P. Bars, head of the botany department at Oregon State college, has to give to the many inquiries his fall wanting to know how they can distinguish the edible from the poisonous mushrooms.

"I think the best plan is to depend on somebody in your locality who really knows mushrooms to teach you to recognize certain edible kinds," says Professor Bars. "There is no bulletin or publication to help the Pacific coast mushroom collector."

"There are hundreds of kinds that are not poisonous but it is unsafe to eat mushrooms unless one knows the particular kind positively is safe, and can identify it positively among other sorts. If that is not possible the safest thing is to let them alone."
