**Timely Revival.**

The reviving of activity in the Umatilla Rapids association at a meeting held in Pendleton last Thursday is timely due to the fact that President Roosevelt expressed the view that the next big federal power development "must be upon the Columbia river."  
 Further activity by the association has been spurred on by the reasonable general belief that development of the Columbia river will start in the near future, and those who are of this conviction have a sound engineers report that gives all data which makes the Umatilla rapids site the most logical place for initial work.  
 If the Umatilla rapids project is developed it will be on the order of enlarging the existing project adjacent to Hermiston which is a better plan than trying to develop entirely new projects.

In quoting from a statement made by one of the officers on the board of army engineers which body studied the subject of river development two years ago, "The rapid project has everything." This statement is backed up by further information gathered which shows that the Umatilla rapids site is the most beneficial of all proposed projects on the river from the standpoint of navigation, because it provides for taming the swift water between Umatilla and Pasco. If agriculture is to be served, this portion of the river must be improved, because most of the producing area of the Pacific northwest is above Umatilla rapids.  
 Federal surveys show that the power generating cost at Umatilla will be cheaper than under any other low head dam proposed upon the river. The proposed development at Umatilla is the most centrally located site which will give easy access to power for all points in Oregon, Washington, and Idaho. The navigation feature makes the Columbia site most favorable for Idaho.  
 All these points favoring the development of the Columbia river at Umatilla rapids were brought forcibly to the front in the plan-

outlined by the Umatilla Rapids association at its meeting last week. They are not points that have been gathered from idle talk but have the backing of the official army engineer's report filed at Washington, along with a lot of good common sense.

**CHRISTIAN SCIENCE CHURCHES**

"Ancient and Modern Necromancy, Alias Mesmerism and Hypnotism, Denounced" was the subject of the Lesson-Sermon in all Churches of Christ, Scientist, on Sunday, May 23.  
 The Golden Text was, "If God be for us, who can be against us?" (Rom. 8:31).

Among the citations which comprised the Lesson-Sermon was the following from the Bible: "From whence come wars and fightings among you? come they not hence, even of your lusts that war in your members?" (James 4:1).

The Lesson-Sermon also included the following correlative passages from the Christian Science textbook, "Science and Health with Key to the Scriptures", by Mary Baker Eddy: "Which would we erroneously term the five physical senses are misdirected, they are simply the manifested beliefs of mortal mind, which affirm that life, substance, and intelligence are material, instead of spiritual. These false beliefs and their products constitute the flesh, and the flesh wars against Spirit. Mortal mind, acting from the basis of sensation in matter, is animal magnetism; but this so-called mind, from which comes all evil, contradicts itself, and must finally yield to the eternal Truth, or the divine Mind, expressed in Science" (pp. 274, 178).

**JOHN BARRYMORE COMING TO OASIS IN FILM COMEDY**

John Barrymore, who occupies a permanent throne in the royal family of the stage and screen, comes to the Oasis theatre for Sunday and Monday in his latest screen romance "Topaze." Myra Loy and a large cast of prominent screen players are in the supporting cast.

Barrymore has gained his greatest popularity in roles such as "Arsene Lupin," gay portrayals in stories that sparkled with wit and sophisticated humor. Such is said to be his part in "Topaze," which affords the great John unlimited opportunity for his talents.

He plays contrasting characters—not actually a dual role, but recasting the physical and moral changes that can be wrought in a man, seen first as an honest, careless and almost doddling professor of chemistry in a French academy, he becomes transformed into a brilliant man of the world. It is in the process of change that the story lies and the course leads through an exciting romance and many strange situations, charged with dramatic as well as humorous moments.  
 According to word from the studios, Barrymore has desired the role of "Topaze" above any other, for he believed its comedy possibilities were ideally suited to his own particular talents.

Nearly every family in the community was represented Saturday among the gathering of people who came for the purpose of helping at the cemetery. Everyone worked diligently and a great deal was accomplished. Ditches were cleaned, trees planted, weeds and rubbish removed and burned. Elaborate plans are being laid for a sprinkling system and supply tank in the near future; also for the purchase of a five acre tract of land joining the cemetery. As soon as this is accomplished more trees and shrubbery will be set out. Next Saturday, April 15, all who can come are invited to take part in the work again. The ladies served dinner in the school dining room for the helpers and will do so again this coming Saturday.

**ON LOOKING AHEAD---**

Agriculture looks ahead—and far beyond the drabness of spring soil—to rich fields of grain—and plenty.

For the past three years the future has been uncertain—business has been going backward. Now we are getting back to a conservative, normal business trend.
