INFLATION BILL GIVES PRESIDENT POWER ON CURRENCY

ADMINISTRATION ANXIOUS FOR IMMEDIATE OPERATION.

Inflation Rider Will Allow President to Expand Currency and Credit \$8,000,000,000

Latest news reports say that the house Wednesday approved the Roosevelt currency inflation and sent its parent, the big farm relief bill, to conference with prospects of a presidential signature by Saturday night.

The inflation rider, which now has complete congressional approval, will allow President Roosevelt, among other things to expand currency and credit by as much as \$8,000,000,000, besides altering the gold backing of the dollar by as much as 50 cents.

It seems that the administration is anxious that the legislation be expedited so that it can be placed in immediate operation for the aid of farmers, hundreds of whom are threatened with loss of property.

The inflation rider to the big farm relief bill gives the president the power to inflate currency and credit, but there has been no definite statement made to date by the executive that this will be done.

Bankers and financial writers are making no assertions until definite action has been taken and there is no way of knowing just how this program of inflation will be carried on through the federal reserve bank.

OREGON MOTORISTS SHOW INTEREST IN RENEWALS.

An indication of the great interest Oregon motorists are showing in the renewal of their drivers' licenses and in the savings accomplished by registration prior to June 9th, is the increasing demand for free copies of the Oregon Motorist's Manual. Hundreds of requests are being received weekly by Hal E. Hoss, Secretary of State, from renewal applicants who wish to study the questions and approved answers before taking the required examination.

"Every possible effort is being made to simplify the procedure necessary under the existing law to obtain a renewal license," declares Secretary Hoss. "After a study of the Motorist's Manual, the applicant should be able to complete the written quiz and the visual acuity tests in approximately 20 minutes. Driving tests are not required on renewals unless the applicant is 70 years of age, or older, or is physically impaired," Mr. Hoss points out.

Only five weeks remain before the new motor vehicle laws become effective, at which time the drivers' licenses will sell for twice the present price. The fee under the new enactment will be \$1, as against 50c now being charged. Motorists must have their licenses renewed, if issued to them prior to July 1, 1931, or forfeit their driving privileges. September 1st has been set as the dead-line for the existence of these old-type licenses, according to the new law.

Those drivers wishing to study the questions and answers in the Motorist's Manual before taking the exams can obtain free copies of the booklet by writing directly to Secretary Hoss, calling at the county sheriff's office, the city hall, or at newspaper offices. Examiners' schedules, which show when and where the tests are given in the 60 individual cities and towns covered by travelling examiners, should be obtained when asking for a Manual.
