J. A. Scollard, agent of the Farm Loan Commissioner, stationed in the Federal Loan Bank in Spokane. In reply to an inquiry he says that "a great many of these irrigation districts are in the same condition, and provision has been made by the last Congress so that they may avail themselves of the opportunity to get their affairs in shape, but until this has been done by the irrigation districts themselves, it is impossible for us to consider applications from individuals with land situated in this nonloanable area."

PINE CITY NEWS

Richard Halliburton, who describes heretofore unseen and forbidden aspects of India and surrounding territory in the dramatic adventure film, "India Speaks", produced by Walter Futter who created the sensational "Africa Speaks", occupies a unique position in American letters. An adventurous vagabond, a convincing lecturer and a world-wide traveler, Halliburton can always be counted upon for novelty in travel and adventure. As an author he leads his readers into strange places, into hilarious difficulties, into new appreciations of history and romance, yet he never qualifies his courageous philosophy of reckless living with a single trite moral. He injects a boldly romantic and bright-spirited appeal into "India Speaks" which stars him for the first time on any screen. His eloquent tongue and the panoramic camera reveal sights amazing as well as spectacular. He shows a million blood-sucking vampire bats swooping from beyond a cliff; a spectacle of horror wherein Hindus inflict inconceivable self-torture; a public purging of filth and disease in the Ganges river; a Ramadan prayer of twenty thousand Mahomedans; a deadly combat between a lion and a tiger; and the dedication of a Buddhist living god to be consecrated by a "white goddess" in the fastnesses of Tibet.

STANFIELD NEWS

Delicious refreshments were served, and an enjoyable time was had by all.

EDUCATOR RELEASES TUBERCULOSIS WORD DEFINITIONS.

An interesting release has been sent out from the Oregon Tuberculosis association headquarters in Portland that will be educational to every person who reads it. The article follows: "When does one use 'tubercular'?" "When does one use 'tuberculous'?" "A leaflet, prepared by Phillip P. Jacobs, Ph.D., the best informed educator in the national tuberculosis field, uses definitions approved by the National Tuberculosis Association as follows: "Tuberculous" is the adjective corresponding to the noun "tuberculosis." It refers to lesions, infections, conditions caused by the tubercle bacillus, the tubercle bacillus, (e.g. "a tuberculous kidney", "tuberculous bone", "of tuberculous origin", "a tuberculous patient".) "Tubercular" refers to conditions resembling tuberculosis but that actually are not. Tubercular means a condition resembling, and similar to, tuberculosis, but a condition that has been established as not being caused by the tubercle bacillus. Its use in reference to tuberculosis is therefore incorrect. "Tuberculosis" is the name of a specific disease but may be used both as noun and adjective. One may speak, therefore, of a tuberculosis patient, or of the disease, tuberculosis, just as one speaks of pneumonia patient. "Physicians, nurses, public health workers, and even tuberculosis patients misuse tubercular. Even the dictionaries are not in agreement on it. Dr. Jacobs declares. For all practical purposes, then, 1. Tuberculous is an adjective describing the disease. 2. Tubercular is never used in reference to tuberculosis. 3. Tuberculosis is the name of a disease, used also as adjective. "Copies of the leaflet by Dr. Jacobs and of others listing symptoms, methods of treatment and prevention, and steps in the cure of tuberculosis, are available at the office of the Oregon Tuberculosis Association, 605 Woodlark Building, Portland. Their preparation and distribution is financed by the annual sale of Christmas Seals. "When students and others are in need of a substitute or synonym for tuberculosis, the Association suggests 'phtisis,' pronounced th-i-s-i-s. Either one means the same as old-fashioned 'consumption'. "The White Plague" was used for years as a popular reference to the disease. It originated with the beloved physician of an earlier day, Dr. Oliver Wendell Holmes, at a time when any of these words spelled death in most cases. The death rate however has been cut in half since 1920, showing much recent progress."
