Employment Possibilities.

And still the work goes on! There is a decided conflict and indecision as to the proper point for development of the Columbia river.

State League, with headquarters at Walla Walla, the Umatilla Rapids. Supporters of each project are presenting the feasibility of each unit to officials at Washington and expecting a hearing.

People on the upper river do not support the idea that river work be confined to sections where the river is already improved for navigation purposes and where new work will not appreciably affect freight rates.

The general belief is that the Columbia speaks for itself in bearing out these convictions. Canalization is called for and this work is entitled to priority if the subject is handled on a basis of service to the empire drained by the Columbia and Snake rivers.

Marshall N. Dana has indicated

that he favors a project that will facilitate immediate employment for thousands of men, in order that the purpose of the public works administration may be carried out. The Umatilla rapids project has been surveyed and all preliminary work has been completed — work can be started as soon as the authority is given.

Now is the time for action, but not for quibbling. Too great an opportunity has presented itself to be thrown away because there is too much divided interest, and too many political strings being pulled in too many directions.

The development of the Northwest is being weighed in the balance!

LOCAL THEATRE WILL SHOW ELGIN NATIONAL ROAD RACES.

A sound picture of the Elgin National Road Races will be shown at the Oasis theatre on Friday, Saturday and Sunday, under the auspices of the Rohrman Motor Company. According to A. F. Rohrman, this picture is a real thriller. The race was held over an 8-mile course with innumerable sharp turns and curves.

The following was taken from an Illinois newspaper: DETROIT, Michigan—All previous records for the famous Elgin National Road Race were shattered when a Ford V-8 won the Joseph Weidenhoff Trophy Race for stock cars of American manufacture on the 203-mile grind at Elgin, Ill., last Saturday.

The winning Ford V-8, piloted by Fred Frame, Indianapolis Speedway champion last year, lowered the mark set in 1929, in the last previous running of the race, by Ralph DePalma, famous race driver, in a high-powered racing car. Frame's average speed was 80.22 miles per hour. DePalma's record was 79.5 miles per hour. The Ford V-8 negotiated the 203-mile course in 2 hours, 32 minutes, 6.1 seconds.

Fifteen cars were entered, including Fords, Chevrolts, a Plymouth and a Dodge. Fords took the first seven places in the event. The Plymouth finished in eighth place. The other cars either were forced out of the race by mechanical failures or were flagged when the race was declared finished.

The highly consistent performance of the Ford V-8 cars finishing in the stock car race is revealed by the race records. The difference in elapsed time for the race between the first and seventh Fords to finish was only 6 minutes, 35.6 seconds and the difference in their average speeds for the course only 3.33 miles per hour.

CHRISTIAN SCIENCE CHURCHES

"Substance" was the subject of the Lesson - Sermon in all Churches of Christ, Scientist, on Sunday, Sept. 10.

Among the citations which comprised the Lesson-Sermon was the following from the Bible: "Every good gift and every perfect gift is from above, and cometh down from the Father of lights, with whom is no variableness, neither shadow of turning" (Jas. 1: 17).

The Lesson-Sermon also included the following correlative passages from the Christian Science textbook, "Science and Health with Key to the Scriptures", by Mary Baker Eddy: "Spirit is the life, substance, and continuity of all things. . . . The substance, Life, Intelligence, Truth, and Love, which constitute Deity, are reflected by His creation; and when we subordinate the false testimony of the corporeal senses to the facts of Science, we shall see this true likeness and reflection everywhere" (pp. 124, 516).

Are You In Step With The Recovery Parade?

The most important essential in the government's great recovery program is for every employer to afford as much and as lucrative employment as his business can possibly stand. Remember, even the hiring of one more person increases the buying power of one more family. Multiply even that small effort by tens of thousands and the results mount up astonishingly. Let's talk things over and see how we can both lend a helping hand to this great campaign for prosperity. We can help the country and ourselves, too, by starting the job here in Hermiston.

Mountains (of Butterfat) Must Be Moved

THE MOUNTAIN

Hundreds of thousands of farmers daily have butterfat to sell. In the counties, even the states, where most is produced, there is surplus. This surplus must be sold to faraway consumers in the cities.

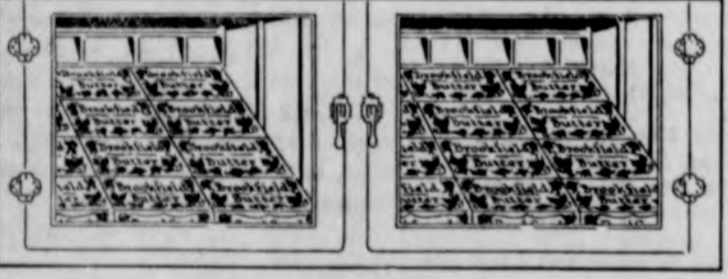

MANUFACTURE

Swift & Company, with its more than 100 produce plants and many buying stations, buys for cash. The next step is processing in a modern churn. Swift makes the finest grades of butter and packs them in attractive style.

TRANSPORTATION

Then distribution. Butter often rides a thousand miles to reach a purchaser. Swift & Company ships in carload lots to a nation-wide market, in which thousands of salesmen dig up and foster demand.

READY BUYERS

So to the retailer. He may be in any one of many thousand cities. Butter goes wherever demand is keen. Swift & Company has hourly information on market requirements — and is able to serve them quickly.

MOUNTAINS of butterfat in the producing areas must be taken care of without delay; else they would lose value. There must be a connecting link between the producer of butterfat (and poultry and eggs as well) and the retailer and consumer.

Swift & Company is a vital link. With a minimum of lost motion and expense, it sends the surpluses to places where shortages would exist without a steady flow of produce.

Swift & Company undertakes all the work of processing, of shipping and of selling to a nation-wide market, an essential service which the farmers can not perform.

Cash prices paid to producers by Swift & Company are competitive and are based strictly on what consumers, through retailers, will pay for the entire supply offered. Sell your poultry, butterfat, and eggs to Swift & Company.
