Stop Killing Birds.

An objection has been voiced by many people to the killing of birds which habitate the project. Small boys who have been allowed to carry airguns have been killing birds which are not doing damage to crops or gardens but which are destroying insects in large numbers.

farmer by destroying the insects and should be protected. If parents will cooperate in this matter the boys may be made to realize the harm done by killing these feathered friends.

Petition Racket to Front.

Latest of the petition rackets under the grand old Oregon system is an initiative for the repeal of the basic science law—the law which requires the practitioners of all healing arts to have at least an elementary knowledge of the structure of the human body and the effects of various chemical and physical processes upon it.

To your door, there may come a usual petition pusher, a sad-looking individual with a sad story. He does not know or care what the petition is all about. He has had a lot of troubles. He needs the five cents a name he is paid for getting signatures.

Read this petition or any petition before you sign it. Be sure you understand it before you sign it and if you sign it. For it is cheaper to donate five cents or two bits or even a dollar to the pitiful petition pusher than it is to add your name to a petition which calls for a useless election which runs up taxpayers costs.

For instance, there is a bit of clever and unscrupulous deception in the movement for the repeal of the basic science statute. People are being told that this is merely a measure which will permit people to hire any kind of healer they want. The implication is that the basic science bill prevents such a choice. This positively is not the case.

The basic science bill specifically provides that a person is free to hire any kind of healing service he thinks best. It merely says that those who are licensed in the healing profession, be they orthodox physicians (M.D.'s) or osteopaths or homeopaths or naturopaths or chiropractors or healers of any sort, must have some idea of what it is all about. They must show that they know the fundamentals of human physiology and chemistry and physics.

The basic science bill does not attempt to disqualify competent practitioners in any branch of the healing arts. It does seek to eliminate outright quacks in every branch of practice, the shysters of the profession who impose their ignorance on the public at tremendous cost not only in money and bodily suffering but in life itself.

People have been killed by smooth-tongued ignoramus who have only certain charms instead of actual healing arts. Right here in Eugene, fanciful remedies of the most hideous sort have been prescribed to men, women and children suffering ailments of the most grievous and dangerous kind, by persons, perhaps well meaning, but utterly unqualified to practice healing arts.

The basic science law is only a reasonable and logical protection to the public against the quacks. There is only no discrimination against any type of practitioner. There is only the provision that he must prove that he knows something about the delicate nature of the human body before he starts.

Read every petition that is presented to you. Refuse to sign any petition which is not perfectly clear and clean cut.—Eugene Register-Guard.

AUTOMOBILE LICENSE REVENUE LOWERED BY SMALL FEE.

Receipts from all motor vehicle fees for the first four months of 1934 totaled \$1,742,152.10, according to a summary of registrations compiled by the office of the secretary of state, P. J. Stadelman. Of the money collected, \$1,600,000 is set aside by law for distribution to the counties for road purposes, which means that the state highway department will get little revenue from license funds and will depend on gasoline taxes and motor transportation charges, collected by the Public Utilities Commissioner, for its income from state sources.

Licenses on passenger cars contributed \$1,113,529.06 to the total, trucks paid \$501,307.03, buses brought in \$27,530.37, and miscellaneous collections, which include certificate of title charges, operators' and chauffeurs' payments, dealers' licenses, and motorcycle fees, made up the balance of \$99,785.70. During the four months, 243,743 passenger cars, trucks and buses were registered, 755 less than the 244,498 listed during the first four months of the last registration period. The fees collected during the

prior four-month season totaled \$1,896,645.72, which was \$64,493.62 more than in the current period. The drop in fees was 3.57 per cent, while the decrease in registrations was only three-tenths of one per cent, due to modification of license rates, particularly on light trucks and deliveries, and to classification of a larger number of vehicles under the farmers' special group at lower rates, through regulations established by the second session of the 1933 legislature in December.

CHURCH NOTES

HERMISTON BAPTIST CHURCH J. T. Dowell, Minister. Bible School at 10:00. Public worship and preaching at 11:00 A. M. The church will have a business meeting Sunday at close of preaching services. Prayer meeting Wednesday at 8:00 P. M.

Come and be a part of a growing community men's Bible class from 9:30 to 10:45 Sunday morning at the Legion hall. The women's class meets at the church at 10:00 o'clock. We welcome you to the Homelike Church with a Homelike Greeting.

CHRISTIAN SCIENCE CHURCHES

"Immortals and Immortals" was the subject of the Lesson-Sermon in all Churches of Christ, Scientist, on Sunday, May 20. The Golden Text was, "As we have borne the image of the earth, we shall also bear the image of the heavenly" (1 Cor. 15:49).

Among the citations which comprised the Lesson-Sermon was the following from the Bible: "Have we not all one Father? hath not one God created us?" (Mal. 2:10). The Lesson-Sermon also included the following correlative passages from the Christian Science textbook, "Science and Health with Key to the Scriptures", by Mary Baker Eddy: "Immortal man was and is God's image or idea, even the infinite expression of infinite Mind, and immortal man is coexistent and coeternal with that Mind. . . . The spiritual man's consciousness and individuality are reflections of God. They are the emanations of Him who is Life, Truth, and Love. Immortal man is not and never was material, but always spiritual and eternal" (p. 336).

"Center" and "Middle" In general usage the words "center" and "middle" may be used synonymously, but in rhetoric there are shades of difference. For instance, one may speak of the center of the earth, or of a circle, or the center of population. We usually speak, however, of the middle of a line, or the middle of a week.

BOARDMAN NEWS

Ernest Peck was a Portland visitor last week. Edward Compton and George Wicklander left for California Monday. Mrs. Julia Marlow returned to her home in Pendleton Wednesday after spending a week with her daughter, and family Mr. and Mrs. Dan Ransier. Lola Bell left for Heppner Saturday evening.
