Interest by the United States government. In a relatively short period after they were issued, they sold above par and had met a favorable reception from farmers and their creditors all over the United States. With the use of these bonds, the refinancing program is going forward rapidly.

## "GLAMOUR" SHEDS NEW LIGHT ON ETERNAL TRIANGLE

"Man proposes, but woman disposes."

Paul Lukas learns this very definitely in "Glamour", the newest drama of the eternal triangle which comes to the Oasis theatre Friday and Saturday with Lukas and Constance Cummings in featured roles. This is fully two weeks ahead of the first Portland showing of the picture.

The glorious voice of Phillip Reed, newcomer to the screen from the New York musical comedy stage, is heard in several songs which are achieving tremendous popularity on the radio.

The numbers include "Heaven on Earth," "Goin' to Town" and "Long Live Love," as well as "Rhumba Exotic," composed as the accompaniment for a colorful Spanish dance performed by Miss Cummings and Reed.

## DAREDEVILS DEFEAT DEATH

FILMING WILD ANIMALS

With the unrelenting ferocity of animals tamed, and the uncompromising cruelty of the jungle itself, "Devil Tiger," Fox Film's saga of the wilderness, crashes across the screen of the Oasis theatre, Sunday and Monday. It is an engagement of the picture that has been hailed as the most terrific of all animal productions.

"Devil Tiger" is the record of a group of people who cut their way through the tangles of the Asiatic jungle, woven by untouched nature for thousands of years. It is the picture of man's latest battle with the elements, that have baffled explorers for centuries. It is an expedition into bare danger, with nature and nature's killers as the enemies that will not quit fighting until they are entirely subdued.

Auto License Examiner Coming.

C. M. Bentley, examiner of operators and chauffeurs, will be in Hermiston Saturday, June 2nd, at the city library between the hours of 9:00 a. m. to 5:00 p. m., respectively, according to a recent announcement released from the Secretary of State's office. All those wishing permits or licenses to drive are asked to get in touch with Mr. Bentley during these hours.

## Auxiliary Officers Will Meet.

All chairman of standing committees and officers of the Hermiston Unit of the American Legion Auxiliary will hold an executive meeting Tuesday, June 5, at the home of Mrs. A. W. Christopherson, in the afternoon. At this time all annual reports will be made out and sent in to the state department. Mrs. Christopherson, publicity chairman, has requested that all officers and committee chairmen furnish her with a snapshot to be used in the publicity book to be entered at the state convention.

## Enterprise Will Celebrate Fourth.

The Enterprise Chamber of Commerce at Enterprise, Ore., announces that a celebration will be held

IF YOU THINK CREAM SEPARATOR DISCS HAVE A SOFT SNAP, JUST REMEMBER THESE FACTS:

A cream separator bowl spins at speeds ranging from 8,000 to 10,000 revolutions a minute. In the heart of the bowl scientifically designed discs direct the course of the whirling, swirling mass of milk, leading the cream to one outlet and the skimmed milk to others. The centrifugal force generated exerts an unbelievably heavy pressure on these discs.

That is another important reason why International Harvester now uses tough, close-grained, strong STAINLESS STEEL DISCS in McCormick-Deering Cream Separators. This modern material resists wear, is absolutely non-rusting, and has no soft coating of tin to wear off. These special features of the stainless steel discs enable the McCormick-Deering Cream Separator bowl to remain in perfect balance much longer than usual. Vibration is kept down to the minimum, your McCormick-Deering turns easily, and its bearings and other parts are protected against unnecessary wear and tear.

The kind of discs your cream separator has is a very important matter to you. Let us bring one of these new McCormick-Deerings to your farm and demonstrate its many outstanding features.

## ARE YOU AWARE!

In the course of one year the balance of your watch makes 157,630,000 revolutions. THINK OF IT! In time the oil gums, produces friction and wears the delicate bearings, destroying their high finish and perfect fit thus ruining an accurate timepiece. An ordinary machine is oiled daily. Your watch should be oiled once a year. Let us examine it. An honest opinion from us will cost you nothing.
