KING VIDOR'S "OUR DAILY BREAD" DUE HERE.

King Vidor launches his career as a full-fledged independent producer with "Our Daily Bread," the powerful human drama which is scheduled to come to the Oasis theatre Friday and Saturday.

This dramatic film, which was not only produced and directed by King Vidor, but written by him as well, tells the thrilling story of a young city couple who find themselves on an abandoned farm, amid a colorful group of men and women, from all walks of life—all determined to start life anew, with the sun, the soil, their and the water as their new allies.

Emotional conflicts greater than any that confronted them in the whirlwind vortex of the city enter their lives—and not the least of these appears in the person of a hard-boiled blonde charmer who invades this potential Eden and uses the old, old weapon of flattery on the impressionable young husband, threatening not only the happiness of the loyal little wife, but the well-being of all her fellow-settlers on the farm as well.

Karen Morley and Tom Keene are cast as the young pair, while Barbara Pepper plays the blonde serpent; John Qualen, who will be remembered for his portrayal of the Swedish janitor in both the stage and screen versions.

THREE SONG HITS SUNG BY COLUMBO IN PICTURE AT OASIS.

REPRESENTATIVE OF OREGON HYGIENE SOCIETY LECTURES

F. B. MESSING PRESENTS WORK TO PARENTS AND PUPILS.

Development of Life in Plants and Animals Shown from Embryonic Forms to Maturity.

Fred B. Messing of the Oregon Hygiene society gave a very constructive talk to the high school student body Monday morning in which he pleaded with the students to take a serious attitude toward life; to set a goal. During the course of his lecture Mr. Messing used many specific instances to illustrate the point he had in mind. One of these was especially forceful.

A young man with whom the speaker is personally acquainted had planned his life 25 years ahead. In making his plans all things that would not contribute directly to his success were eliminated. The young man did not stop to debate whether smoking or drinking would hurt him, but rather asked, "Will such things be a definite advantage to me?"

Dr. Messing also cited reports he had received from high school graduates in Portland who had perfect records. A large number of these students reported that hard work and good teachers were largely responsible for their achievements. However, two said they were just naturally bright and couldn't help making perfect scores.

Following Mr. Messing's lecture to the entire student body, separate lectures were delivered to the boys and girls. The speaker spent an entire day at the high school conducting his work. In the afternoon, moving pictures were shown on the screen which depicted the development of life in plants and animals from embryonic forms to maturity. On Sunday afternoon Mr. Messing appeared before a group of adults at the school house to explain the purpose of his work. Tuesday and Wednesday was spent in the Stanfield and Echo schools.

SHARPSHOOTERS WIN TURKEY AS CLAY PIGEONS FALL

Clay pigeons brought down by sharpshooters at the turkey shoot Sunday, November 25, will be one reason for at least twelve families having turkey on Thanksgiving day this week. The turkey shoot was sponsored by Roy Thomas and Roy Hale of Hermiston and despite a cold west wind which blew continuously, there was a good turnout in the afternoon.

Birds went home with James Todd, Eugene Pierce, Bill Shaar, Eugene Hanby, M. T. Matott, Herbert Hedwall all of Hermiston, Burk Bowker of Lexington and Bill Shepherd and C. D. Shepherd of Umatilla. Many of the boys were unaccustomed to shooting at clay pigeons, due to the fact that no turkey shoot has been held here in many years.

PROJECT FARM BUREAU RE-ELECTS H. J. OTT AS ITS PRESIDENT

PROJECT LEADERS RE-ELECTED AND REPORTS GIVEN.

Dairy Cattle Disease Eradication Program Explained; Project Fair Board Reports.

At the annual meeting of the Umatilla Project Farm Bureau held in the Hermiston Union church Saturday, November 24, officers were unanimously re-elected to serve during the coming year. H. J. Ott was again named as president, A. E. Bessel, vice-president, C. M. Jackson, secretary-treasurer, and the following project leaders: L. C. Dyer, dairy; Mrs. Geo. Genn, poultry; J. Jendrzewski, rodent control; E. L. Jackson, 4-H club; W. G. Rodda, bees and fair exhibits; J. W. McMullen, marketing; Dr. Theo. Beletski, disease control; H. K. Dean, crops; A. E. Bessel, recreation, C. L. Upham, park superintendent; and Ed Dunning, legislative. Wm. A. Sawyer replaced Garnet D. Best as farm organization project leader.

The meeting opened with community singing lead by A. E. Bessel, in initiating the new song books.

L. C. Dyer reported on the dairy industry on the project. He pointed out that there had been an increase of 15 per cent in dairy cows and 40 per cent in heifers during the past year. He emphasized the need for more cooperation in the federal disease eradication program, which is under the supervision of Dr. Sam Foster of Portland, federal veterinarian. At present, he said, there were only 130 of the 450 herds on the project which were signed up under the disease eradication program.

In her report, Mrs. Geo. Genn announced that on January 5th, the Washington Cooperative Chick Hatchery, would show moving pictures of the growth and care of chicks, at the Hermiston Union church. It was brought out that 3000 more turkeys were raised on the project in 1934 than in 1933, and that the number of chickens raised on the project had decreased.

J. Jendrzewski urged farmers to continue the campaign of poisoning rabbits, coyotes, minkes and gophers. He pointed out that the county court had allocated \$1500 toward the eradication of coyotes in Umatilla county during the past year. J. H. Reid stressed the need of eradicating gophers which may be carried on by each individual farmer, by planting poison carrots at least once a year, preferably in the fall while the gopher is storing his winter food, and in this way perhaps eradicate more than one of the pests with the same bait.

W. G. Rodda reported that a display of melons and grapes had been sent to the state fair at Salem, together with a display of grain and forage crops from the east end of the county.

Assistant County Agent Sawyer reported on 4-H club work in the absence of the project leader, E. L. Jackson.

Girls' club work has progressed in the past year both on the Hermiston and Stanfield projects, and one (Continued on page 4)

ALONG THE CONCRETE

Now begins the season when the merchant counts the days, and we count the pennies.

Another "Believe It Or Not" was sent in this week by L. C. Dyer who said that he had picked sufficient strawberries from his patch to serve strawberry shortcake to three people. The vines are not the everbearing variety either.

What could be worse than chickens in a flock of turkeys at Thanksgiving time. Some of these old gobblers are pretty wise.

Tom Jensen says that he will verify his statement that 3-month old pigs at the C. E. Baker farm go to roost on the chicken roosts at night. He has seen them there with his own eyes, and they didn't have feathers on either.

The turkey gobblers his last gobble before Thanksgiving and then is gobbled up.
