The Portland Chamber of Commerce is now negotiating with E. P. Dodd of Hermiston to carry on a campaign in this part of the state to raise funds with which the Portland Chamber of Commerce may further its program for upper Columbia river development for navigation to the Snake.

It is easy to understand when one reads the rate differential adjustment story appearing in today's Oregonian which states in part, "It has been pointed out previously, however, by Portland observers that restoration of parity rates would react as a stimulant for the development of river transportation to the great wheat country inland. Such development, it is predicted, will bring about a rate differential, not only on grain but on all Columbia basin products, much greater than the 10 per cent which has been lost."

For years the Columbia basin 10 per cent rate differential on grain and grain products originating south of the Snake river, has been in Portland's favor, but now that it has been scrapped by railroads serving Portland and Vancouver, the only way Portland ports will benefit from Inland Empire tonnage is through the development of navigation on the Columbia and Snake rivers. The market for wheat farmers will no longer be limited to Portland, which is estimated to have cost growers in the district south of the Snake over \$150,000 a year because of restricted markets.

If Portland interests are truly waking up to the need for Inland Empire tonnage to feed their ports and industries, a working plan to this end can be obtained, and with the knowledge of the river that Mr. Dodd has it is realized that his services would be valuable.

For the past 14 years Mr. Dodd has promoted river development activities. In an issue of the Herald of October 12, 1923, Mr. Dodd gave a report to the Hermiston Commercial club boosting the Umatilla Rapids dam which then contained the power feature. An extract from that report said: "In the first place the Umatilla Rapids dam site is the center of a great territory needing cheap power. It is of equal distance from Portland, Seattle, Spokane and all intermediate points. It is near the great Yakima project; and a part, so to speak, of the greater Umatilla project, and the latent John Day, and only a short distance from the thickly settled irrigated Walla Walla districts. It is where railroads converge, with the line of a great railroad system at each end of the dam site, each with numerous branches into a large territory. It is on the only navigable river of consequence in the great Northwest; and the drowning out of these rapids will open this stream for 400 miles into the interior of the Inland Empire."

Mr. Dodd's vision pictured above has now spread until it has reached the eyes of influential men at Washington, D. C., and is now receiving a reaction from Portland interests.

CHRISTIAN SCIENCE CHURCHES

"GOD" was the subject of the Lesson-Sermon in all Churches of Christ Scientist, on Sunday, January 6. The Golden Text was, "Now unto the King eternal, immortal, invisible, the only wise God, be honour and glory for ever and ever" (I Tim. 1:17). Among the citations which comprised the Lesson-Sermon was the following from the Bible: "For I know that the Lord is great, and that our Lord is above all gods" (Ps. 135:5). The Lesson-Sermon also included the following correlative passages from the Christian Science textbook, "Science and Health with Key to the Scriptures", by Mary Baker Eddy: "God is individual, incorporeal. He is divine Principle, Love, the universal cause, the only creator, and there is no other self-existence. He is all inclusive, and is reflected by all that is real and eternal; and by nothing else. He fills all space, and it is impossible to conceive of such omnipresence and individuality except as Infinite Spirit or Mind" (p. 331).

The local meetings are held at 11:00 A. M. every Sunday in the American Legion hall.

BEAUTIFUL ADVENTURE SPURNS LOVE, SEEKS DIAMONDS

Glamour, thrills, romance and humor, mark "One Exciting Adventure," the second American film of Binnie Barnes, which plays at the Oasis theatre Sunday and Monday. The story is that of a fascinating woman who is unable to look at a beautiful diamond without wanting and getting it. Men mean nothing to her until she meets Neil, and she means nothing to him. She becomes involved with Mr. Cavanaugh, who enacts the part of the most accomplished crook in Europe, and the struggle of the two men, one of whom she wants and the other who wants her, provides the basis for one of the most interesting and thrilling yarns that has reached the screen in a long time. The excitement of the picture is punctuated by the blunders of Eugene Pallette and Grant Mitchell who appear as the most riotously funny team of detectives who ever trailed a glamorous crook.

TIRED, NERVOUS, RUN-DOWN? fight "colds" the vitamin way

YOUR health power shrinks in winter. You stay indoors more - get less exercise, less fresh air. The sunshine is sickly. As a result, you catch "colds" easily, you can't sleep, you feel off your feed. Science tells us that "colds" and other winter illnesses are often the result of lack of vitamins A and D. A is your body's first line of defense against infection. D - the "sunshine" vitamin - builds body, bones and teeth. Thanks to modern discoveries, you can obtain these two valuable vitamins throughout the winter. MCKESSON'S has separated them from cod liver oil, and concentrated them in delicious chocolate-coated tablets.

MCKESSON'S VITAMIN CONCENTRATE TABLETS OF COD LIVER OIL help you stop "colds" before they start, and give new vitality. Each tablet brings you all the vitamins in one teaspoonful of U. S. P. X. (revised 1934) Cod Liver Oil. Take them yourself, and give them to your children. They contain calcium and phosphorus to help youngsters build sturdy bones and sound, even teeth. These tablets are a food, not a medicine. Get them at your druggist's. A dollar bottle brings you 100 tablets. Children love their tempting taste. Protect your family from the danger of becoming "run-down" with MCKESSON'S VITAMIN CONCENTRATE TABLETS.
