The Fallacy of "Free Money."
 The American public has come to look on the Federal government as a financial Santa Claus, which goes on forever distributing the bounty of "free money" for one purpose or another. One of the proudest boasts of many elected officials is that they have been able to get this appropriation or that for their state.
 Current plans call for an expenditure of some \$5,000,000,000 for public works by the Federal government. Much of this great sum will be distributed to the states, to spend for roads, relief, dams, public buildings or some other public purpose. When the money has been spent, citizens will look at the imposing courthouse or superhighway or what ever it created and think happily that it cost them nothing—that magical forces at play in Washington produced the money out of the air and kindly passed it on.
 Well, that \$5,000,000,000 will be raised through the sale of Federal bonds. These bonds amount to a mortgage on every piece of property in the nation—every home, farm, factory or investment. If the \$5,000,000,000 is divided by the number of Congressional districts in the country, the share for each district amounts to about \$12,000,000. Every nickel of that money must be paid back by the American people through taxation—and they must pay, in addition, many hundreds of millions more in interest on the government bonds. Probably few Congressional districts would burden themselves with a \$12,000,000 bond issue if it were proposed to vote such a debt against the district.
 Unhappily, there is no such thing as a financial Santa Claus—the tax money put in our stockings is taken out of our pocketbooks—plus interest.

Oldsters Gaining on Youngsters.
 In 1880 the number of those under 20 years old in this country was four times as great as those over 50.

In 1930 the proportion was only two to one. At the present rate of change the two groups will be equal by 1950. These figures are cited by Dr. E. H. Moore, professor of sociology at Oregon State college, as one of several sociological reasons why the question of old age pensions has become a live issue in America.

CHRISTIAN SCIENCE CHURCHES

"SOUL" was the subject of the Lesson-Sermon in all Churches of Christ, Scientist, on Sunday, February 17.
 The Golden Text was, "Set your heart and your soul to seek the Lord your God" (1 Chron. 22:19). Among the citations which comprised the Lesson-Sermon was the following from the Bible: "The Lord redeemeth the soul of his servants; and none of them that trust in him shall be desolate" (Ps. 34:22).
 The Lesson-Sermon also included the following correlative passages from the Christian Science textbook, "Science and Health with Key to the Scriptures", by Mary Baker Eddy: "When understanding changes the standpoints of life and intelligence from a material to a spiritual basis, we shall gain the reality of Life, the control of Soul over sense, and we shall perceive Christianity, or Truth, in its divine Principle. This must be the climax before harmonious and immortal man is obtained and his capabilities revealed. It is highly important—in view of the immense work to be accomplished before this recognition of divine Science can come—to turn our thoughts toward divine Principle, that finite belief may be prepared to relinquish its error" (p. 322).

The local meetings are held at 11:00 A. M. every Sunday in the American Legion hall.
OSC Savant Writes Eugenics Book.
 CORVALLIS—On the age-old controversy concerning the relative importance of heredity, environment, studies of identical twins reveal that both are important and that good environment is often necessary for maximum development of hereditary traits. This is one of many points made in a new book "Principles of Genetics and Eugenics" by Dr. Nathan Fasten, head of the department of zoology at Oregon State college, just published by Ginn and Compa-

THROUGH THE CENTURIES THE GREATNESS OF GEORGE WASHINGTON GROWS CLEARER.

The passage of time but serves to make his memory more sacred to all Americans.
 The truth which he formulated in conducting the affairs of his administration, have been proved sound and wise by subsequent events. In making decisions, Washington thought not only of the past but of the future applicability of his principles. It was this quality of foresight that made him a great man. It is this same quality of foresight, of thinking for the future, that will aid you in your struggle for success.

Tablets of sunshine for growing children
 SLUSH and snow keep children inside on many winter days. What sunshine they get is weak in the rays that produce vitamin D. No wonder youngsters lose their pep, become victims of winter ills.
 It is tremendously important that your children get their share of vitamin D in winter. It prevents rickets, and builds strong bones and teeth. They also need vitamin A to resist infection.
 For children especially, we suggest McKesson's VITAMIN CONCENTRATE TABLETS OF COD LIVER OIL. Children love their tempting taste. Each delicious chocolate-coated tablet brings all the vitamins in one teaspoonful of U. S. P. X. (revised 1934) Cod Liver Oil. And in addition it supplies calcium and phosphorus.
 Give them to your children regularly—and note the results; fewer "colds" and greater resistance to other respiratory diseases, lustier appetites, more pep.
 MCKESSON'S VITAMIN CONCENTRATE TABLETS OF COD LIVER OIL are just as good for grown-ups. They help protect you against illness and add to your vitality.
 Protect health the vitamin way. Take these tablets regularly. Give them to your children to help them grow sound bones and teeth. Buy them at any good drug store. A dollar bottle brings you 100 MCKESSON'S VITAMIN CONCENTRATE TABLETS.
