PLUS SHORT FEATURES.

The SPERRY FLOUR CO.

Is the undisputed leader in the turkey feeding business. Their Commercial Feed Department pioneered the way toward better turkey feeds in face of the stiffest kind of opposition.

The largest turkey flocks in the West are not only being consistently fed Sureturk and Suregobble, but Sperry turkey feeders are making profit progress of the type that is attracting attention wherever turkey feeding is discussed. Competition has consistently under-quoted Sperry's turkey feeding prices in an effort to wrench away from Sperry the feeding of some of the most famous flocks in the West, but all unsuccessfully.

Sperry holds the business by virtue of sheer feeding value of its Farm Tested Feeds. This value shows up in the weight, grading, tenderness of flesh, and profit to the feeder.

THE ELLIS FEED STORE

Nicholas Codd of Spokane was a business visitor in town Tuesday.

Mrs. B. Everett, who has been visiting her daughter, Mrs. W. L. Morgan for the past week, left Monday for her home in Portland.

Mr. and Mrs. B. Hanelline were Sunday dinner guests at the home of Mr. and Mrs. F. M. Guiwits.

Lenore Wall spent Easter Sunday with her sister, Miss Louise Wall, in Dayton, Wn.

Mrs. J. P. Lane and daughter, Marie, and niece, Marion Sturdivant, left Wednesday for Parkdale to attend the golden wedding anniversary of Mrs. Lane's parents, Mr. and Mrs. Sturdivant.

WHEAT GROWERS TO VOTE

IN NEW CONTROL PROGRAM

A national referendum on May 5 among wheat growers will precede offering of new wheat acreage control contracts. Oregon State college officials have been notified from Washington. A regional conference of extension men to arrange for the vote in the northwest states has been called to meet in Walla Walla Saturday, April 20, with Dean Wm. A. Schoenfeld of OSC designated as chairman.

First announcement of proposed provisions of the new wheat contracts came in the call for the referendum. As present contracts expire with this crop year, it is proposed that the new agreements start with 1936 and continue four years through 1939.

In all fundamental features the new program follows the old which has been generally acclaimed as among the most satisfactory of the adjustment efforts. It holds out additional inducements to shift land from wheat to grass in drought and dust storm areas, and permits minor adjustments on individual farms to improve rotation or other proved farm practices.

As in the past, the support of ad-

justment with rate and condition of benefit payments would be determined from year to year, but extent of required curtailment is limited to 25 per cent of base acreage.

Base periods are continued the same as at present in the new contracts, and local administration is continued through the county control associations. The agreement would continue to be entirely voluntary.

The plan for referendum on the continuance of the program is in line with the policy by the AAA is not promoting any plan that is not urged by a substantial majority of any industry. The same plan was followed in advance of launching the 1935 corn-hog program.

The objective sought in the new wheat control program is to keep wheat production in line with consumption needs plus probable export demands and the safety carryover needed to guard against emergency conditions.

PINE CITY NEWS

By Oleta Nell
