O. M. CLARK - HERMISTON

Car of Tomorrow will be Grown, says Ford

Henry Ford believes that a great share of the materials for the automobile of tomorrow will be grown, not mined, as today. This Industrialized Farm Exhibit at the Ford Exposition, San Diego, shows the close relation between farm and shop. For some time extensive research along these lines has been sponsored by the Ford Motor Company.

During 1935, the farmer will work to help supply materials for one million cars. Three million, two hundred thousand pounds of wool, requiring 800,000 sheep to produce it, is but one item in the long string that includes wood, linseed oil, hogs, cotton, hides, corn, motor oil, soy beans, molasses, cotton and many other products.
