Reasons for New High School.

Members of the Hermiston Union High School board for District No. 9 did not authorize the high school district bond election for a new school building which entails \$40,000 without first considering the present need, advantages of immediate construction and the disadvantages of remaining in the present crowded quarters.

One of the first considerations was the need for a high school building to relieve the overcrowded conditions in the grade school building. The high school district does not own any property except a few typewriters, desks and school room furniture, and for years has rented space in the grade school from school district No. 14.

A second reason considered by the board was the advantage of immediate construction while the government is offering a 45 per cent grant at 4 per cent interest to be paid back over a period of 30 years. Without this federal grant the same building could not be constructed for less than \$100,000 direct cost to the school district, and under the present PWA set-up the cost to the district will only be \$40,000.

Another reason for present construction has been the evident lack of gymnasium and auditorium facilities, not only from the standpoint of sports but as an aid to the building of the physique and fitness of the students in both high school and grade school. Physical training should not only be available for high school students but should start in the grade school with regular gym classes to correct faulty posture and regulate suppressed energy.

It will be impossible for Hermiston to schedule home basketball games this year with nearby schools because of lack of a proper regulation floor and shower facilities. Such a condition should not exist in such a progressive, growing community as Hermiston.

The high school board is not trying to "put anything over" on the taxpayer but has considered this bond issue from every angle before calling the election. There is sufficient time between the time notice is given and the date of election for every taxpayer to investigate the matter thoroughly by talking with the board members and checking available data on the reasons for proposed construction.

The fact that the Umatilla rapids dam may be built in the future is not the incentive for construction because there is an immediate need for more class room space to take

care of the present enrollment in the high school. An influx of students would undoubtedly result, following authorization for the construction of the dam, but the reason for immediate construction is to take care of our own immediate district needs.

All legal voters who want the new high school building should vote at the election Tuesday, August 6, at the polls in the school building between the hours of 2:00 P. M. and 7:00 P. M.

This church is undenominational, being composed of many different denominations. It is not governed by any human discipline, conference, synod, association, board (state or national), but is governed only by the New Testament teachings and practices as found therein.

If you believe there are too many denominations, then will you help us in our effort to practice Christian Unity in Hermiston as Jesus prayed for in the seventeenth chapter of John?

We invite you to this growing church.
