HERMISTON COMMUNITY PARK ASSOCIATION SET-UP PRINTED

The articles of association for the Hermiston Community Park association are set forth in the original copy in the following which gives the public an opportunity to know in what way the park will be maintained and under what plan the association was organized. The by-laws will be published at a future time.

Articles of Incorporation
of
Hermiston Community Park Association.

We, whose names are hereto subscribed, being all the directors of the Hermiston Community Park Association, a voluntary organization of citizens of Hermiston, Oregon and vicinity, having for its purpose the promotion, establishment, construction and maintenance of a public park in the City of Hermiston, Oregon, do hereby associate ourselves together for the purpose of forming a corporation to carry out the purposes of such organization, without profit to said corporation or to the members thereof, under the Non-profit Corporation Laws of the State of Oregon, and for that purpose state the following:

ARTICLE I.

The name assumed by this corporation and by which it shall be known is the Hermiston Community Park Association and the duration of this corporation shall be unlimited.

ARTICLE II.

The objects, business and pursuit of this corporation and the undertakings in which it proposes to engage are:

1. To promote, establish and construct a park or parks, golf course, swimming pools, play grounds, fair grounds, halls, buildings, grounds and other things for public use, to manage and control the same and to provide grounds, buildings and property for the same.

2. To purchase and acquire real and personal property to be used for the purpose set forth above, and to buy, own, construct and provide public halls and other buildings, play grounds, fair grounds, swimming and wading pools, golf courses and park grounds.

3. To maintain and conduct a community park, golf course, fair grounds, play grounds, swimming and wading pools, halls and buildings and parks and other things for the use of the members and their families and the public in general under rules and regulations prescribed by the board of directors.

4. To buy, acquire, own, lease, sell and exercise all privileges of ownership over such real and personal property as may be deemed desirable or advantageous.

5. To borrow money and to give such security therefor as is necessary and proper for the purpose of purchasing real and personal property deemed advisable and advantageous in connection with the purposes of this corporation.

6. To do any and every thing necessary and proper for the purpose of acquiring and maintaining a community park, swimming and wading pools, golf courses, halls and buildings, play grounds, fair grounds and other things for the use of the members and the public, and to exercise all powers, rights and privileges not in conflict with the laws of the State of Oregon which may be necessary, convenient or incidental to the purpose or purposes for which this

corporation is organized.

ARTICLE III.

The estimated value of property and money possessed by said organization is nothing and the sources of revenue and income of this corporation are from voluntary contributions.

ARTICLE IV.

This corporation shall have no capital stock. Any person shall be eligible to membership upon paying an annual membership fee of \$2.00.

ARTICLE V.

The persons making these Articles of Incorporation are all the directors of said Hermiston Community Park Association, duly chosen, and the said F. C. McKenzie is the president, the said J. H. Reid is the vice-president and the said W. J. Warner is the secretary and treasurer of said organization, duly chosen, and the post office address of each of the undersigned is Hermiston, Oregon. The successors of said directors shall be elected by the majority vote of the members present at a meeting of the members to be held on the second Friday in December, 1935. The successors of said president, vice president, secretary and treasurer shall be elected by a majority vote of the directors of said corporation present at a meeting of said directors to be held on the third Friday in December, 1935.

ARTICLE VI.

The principal office and place of business of this corporation shall be at the City of Hermiston, Umatilla County, Oregon, and its post office address shall be Hermiston, Oregon.

IN WITNESS WHEREOF we, the undersigned have hereunto set our hands in triplicate this 4th day of March, 1935.

W. J. Warner, J. H. Reid, E. D. Martin, E. L. Jackson, S. F. Moore, A. E. Bensele, L. C. Dyer, F. C. McKenzie and H. K. Dean.

SEAT PADS ON WOODEN CHAIRS SAVE CLOTHING

Straight varnished or painted chairs, some of which are found in almost every house, not only sometimes seem a little plain and uninteresting, but often are somewhat uncomfortable. And they tend to make clothing shiny.

An inexpensive way to improve them is to make seat and back pads of a printed fabric that harmonizes with other furnishings, says Miss Joan Patterson, extension specialist in home furnishing at Oregon State college. The pads protect the clothing and also the chair finish. They are tied or snapped on and can be taken off to be laundered. As straight chairs are usually the right sitting level, the pad must not be made too thick or it will make the seat too high for comfort.

To make a seat pad, cut the desired number of thicknesses of cotton batting to exact shape of the chair seat, but half an inch smaller on all sides. Put these between layers of cheesecloth and baste twice each way and then around the outside edge to keep the cotton from knotting when the pads are laundered. The outside cover is merely a slip that may be put over the pad and closed with snaps at the back or basted together. Make tapes of the same material to tie the pad to the chair posts.

The back pad is measured and fitted in a similar way, and kept at the right height on the chair by sewing tapes to the top corners and snapping them just below the top bar of the chair back. At the bottom, the back pad may be finished with tape loops and the tapes of the seat pad passed through these to hold the back pad down. Another idea is to make the back cover to slip on, with two bound holes for the posts to come through. This type reaches about two-thirds of the way down the back. On attractive finish is to sew white cotton braid or ball fringe around the lower edge.

POULTRY

SUNSHINE IS BEST TONIC FOR LAYERS

Hens Exposed to Light Rays Produce Vitamin D.

By H. L. Kemper, Professor of Poultry Husbandry, University of Missouri, WNU Service.

Few people realize the importance of direct sunshine in the successful winter management of the laying flock but recent discoveries indicate that sunshine plays an important part in the productivity of the laying flock. The reason for this is due to the beneficial effects of certain light rays. When the hen is exposed to them she is able to manufacture vitamin D which is associated with mineral metabolism. In other words when a hen is exposed to direct sunshine she can utilize the minerals in her food to advantage. Hens exposed to direct sunshine not only lay more eggs but the eggs are apt to have stronger shells, and if used for incubation will produce better hatches. It is thus seen that some measures should be taken to expose the hens to sunshine on all possible occasions especially in winter.

Due to the fact that most of the glass used in poultry house construction filters out these beneficial light rays a certain amount of the window space in the house should consist of an open space which may be covered with cloth frames which may be closed in inclement weather or at night but which should remain open on sunny days. The usual rule is to provide a square foot of cloth frames for each 15 square feet of floor space in houses of average size—14 to 16 feet from front to back. The amount should be reduced somewhat in narrow houses and increased in houses which are deeper.

Another advantage of the open space is that it provides excellent ventilation. Even at night when the curtains are closed fresh air will enter the house and ordinarily when open the airing out of the house during the day will remove much of the moisture so as to encourage a dry house.

Train Pullets to Lay in Floor Nests; Clean Eggs

Many of the badly soiled eggs picked up during the winter came from the habit of some pullets of dropping their eggs from the roosts or on the floor, under the roosts seeming a favored place, where there are no dropping boards. The best way to train these pullets, says the Nebraska Farmer, is to place clean nest boxes on the floors where the eggs are most frequently dropped. The pullets soon take to the floor nests, which can be raised by degrees, or may even be left there, if the hens seem to prefer them.

Another source of soiled eggs is the habit of some hens roosting in nests in preference to roosts. If taking these hens from the nests lightly for a week or so and placing them on the roosts does not break them of nest-roosting, better sell or eat them and get rid of that annoyance. Hanging burlap curtains one-half or two-thirds of the way across the front of nests tends to discourage nest-roosting without deterring hens from entering to lay. There will be few offensively dirty eggs if these precautions are observed.

Good Plan to Caponize to Make Cockerels Pay

What to do to make the cockerels bring a larger return is always more or less of a problem. For those who raise the lighter breeds, such as Leghorns, the best thing to do is to dispose of them as broilers just as soon as possible, says a writer in Successful Farming. This will probably be when the young males weigh in the vicinity of one and a quarter pounds. The sooner they can be marketed the better. With the heavier breeds, such as Plymouth Rocks, Rhode Island Reds, or Wyandottes, it is a different proposition.

In this case, if there is a good private broiler market, or if good prices can be obtained from a dealer, it is probably good business to sell them. The usual demand for such broilers is for stock weighing two pounds or two and a half pounds. If, however, the price is not good enough to make something on them, it is a better plan to hold them until they can put on enough weight to qualify as small roasters, weighing at least four pounds. If there is a good local private trade for capons, it will be worth the flocks owner's while to caponize a few when the males weigh about a pound or one and a quarter pounds. A private trade is the best kind to cater to when capons are to be marketed. The presence or absence of such a trade in any locality should decide whether or not it is desirable to caponize. Many are finding such a trade profitable, for they get from 8 to 12 cents a pound more than they do for roasters.

Substitute for Greens

A good substitute for winter green food is alfalfa or clover hay, says a University of Missouri authority. To feed, provide a rack 18 inches above the floor so that the chickens may pick at the leaves. If the hay is baled it may be fed in the bale, simply turning the bale over after the leaves from one corner have been consumed. The unconsumed portion may be used as litter. Others use from 5 to 10 per cent alfalfa leaf meal in the laying mash.

PINE CITY NEWS
By Lenna Neill

The Pine City schools are closed for this week due to danger of the spread of scarlet fever epidemic. There are no cases in the vicinity, but fear of a spread is prevalent.

L. D. Neill was a business visitor in Heppner Wednesday.

Mrs. Emery Cox and family spent Wednesday visiting at the H. E. Young home.

Miss Isabella O'Brien returned to The Dalles Sunday to resume her studies at the St. Mary's academy.

Miss Erma Scott of Lexington has been visiting her grandmother, Mrs. L. D. Neill, for the past week.

Pendleton visitors from here Saturday were Mr. and Mrs. John Healy, Mrs. T. J. O'Brien and daughter, Isabella, Burl and Earl Watenburger and Mr. and Mrs. R. D. Estle and son.

W. D. Neill accompanied Ralph Saylor to Portland Friday returning home Sunday evening.

Fred Rauch visited with Julian Rauch in Lexington Saturday.

Mr. and Mrs. R. D. Estle and son F. J. motored to Arlington Sunday.

Mr. and Mrs. Frank Helms were business visitors in Hermiston Saturday.

Lowell Young and Charley Lee were employed on the Tony Vey

ranch last week. Emery Cox was a business visitor in Echo and Hermiston Sunday.

COLUMBIA NEWS
By MARIJANN HAMMER.

Buck Ogby left Sunday for San Francisco, Calif., where he will make his home with his uncle.

Joe Hawkins of Adams was a business visitor in Columbia Monday.

Howard, Harold, Bill and Ben Nelson left Sunday for Portland where they will remain for some time.

Carl Hammer and Gloria Peltier were visitors in Pendleton Wednesday.

Mrs. N. G. Folsom of La Grande and Mr. and Mrs. Trailer of Pendleton visited at the Bill Struthers home Wednesday.

Mr. and Mrs. Carl Hammer, who were formerly living on the Waller place, have moved to the place formerly occupied by Mrs. Tucker.

H. O. Dixon, who has been ill for some time, is greatly improved.

The Blue Ribbon Calf club presented a play entitled, "Winning Pa" Saturday evening at the Farm Bureau meeting.

Wm. Barber returned home Thursday from the Veterans' hospital in Portland.

Many people in Columbia district are ill this week from colds.

Fern Lindner returned home from Walla Walla this week after visiting friends.
