Stainless Steel Discs The Biggest Improvement in Cream Separators in Years

STAINLESS STEEL DISCS with electrically welded stainless steel spacers—the most important improvement in cream separators since McCormick-Deering pioneered the use of ball bearings in cream separators.

What does this advanced McCormick-Deering feature mean to you? Just this—that it provides the same sanitation that you demand of kitchen equipment, and the same high skimming efficiency year after year. Even after hundreds of hours of service, the stainless steel discs in the McCormick-Deering look like new—no rusting... no pitting... no coating worn off. Ask us more about the great advantages of stainless steel discs.
