

FARM CO-OPERATIVE DIVISION

A MESSAGE TO EVERY MEMBER.

CANNING SCHEDULE

From June 8 to 13.
 MON.—1 to 4 P. M., Asparagus.
 TUES.—1 to 4 P. M., Peas.
 WED.—1 to 4 P. M., Asparagus.
 THURS.—1 to 4 P. M., Peas.
 FRI.—1 to 4 P. M., Asparagus.
 SAT.—9 A. M. to 2 P. M., Peas.
 Other products not listed will be canned by making special appointment.

Please watch these schedules closely each week as it is impossible to run them without some changes.
 HERMISTON CO-OP. CANNERY

FILLING OUT AGRICULTURAL CONSERVATION WORK SHEETS

As has been previously announced it is expected that the closing date for filling work sheets under the Agricultural Conservation program will be set for some time the latter part of June. This means that the 600 or 800 farmers on the Umatilla project are going to have to come in to the assistant county agent's office between now and that time. To date a relatively small proportion of this number have filled out work sheets.

Those farmers who are interested in having information about their farms on file so that at a later date they may take part in the program should come in to the office as soon as possible so that work will not pile up the last week or two of the allotted time for getting this information in.

Farmers are urged to come in any afternoon between the hours of one and five o'clock during the next two weeks. W. A. Sawyer reports that he will be out of the county, attending the 4-H club summer school sessions at Corvallis during the next two weeks, but that John Pace, office clerk, is fully qualified to render all assistance necessary in filling out these forms. Mr. Pace is in the office from one o'clock until five. There will be no one in the office during the forenoon of these two weeks.

It will require very little time to give the information called for on the work sheet, and the farmer is in no way placing any obligation upon himself by giving this information. This makes it seem advisable to have a work sheet on file so that farmers in the area may receive any benefits which are coming to them this fall. If the work sheet is not on file it will probably be impossible to take part in the program regardless of what it might offer by fall.

TWO CLASSES OF PAYMENTS DISTINCT IN AAA PROGRAM

"What payments can I qualify for under the new federal agricultural conservation program?"

The answer to this basic and important question are still desired by many Oregon farmers who are not clear as to the distinction between the two types of payments provided, according to word received from extension officials active in explaining the details of the new program. Here are the latest official condensed definitions of the two payments as contained in a recent leaflet of the triple A:

"Class I (soil-conserving) payments—For shifting in 1936 to soil-conserving crops some of the acreage formerly used for soil-depleting crops.

"Class II (soil-building) payments—Made to farmers who in 1936 use approved soil-building practices on their crop land or pasture.

"A farmer may qualify for either payment, or for both."

The announcement recently made in Oregon as to rates to be paid per acre for soil building practices referred to the rates of the Class II payments. They have nothing whatever to do with the Class I payment, even though they may apply at times to the same land, the extension men explain. They are the smaller payments.

Announcement has just been made of the rates for the Class I payments. These are set so that each county has its own rate. The county rates are determined on the basis of the average yield in each over the past 10 years of a group of selected soil depleting crops. Counties with a high average production are graded a correspondingly high Class I payment rate, in accordance with the figures arrived at by the Triple A from soil depleting crop data. Within the county, each farm will also be rated according to its comparative productivity, with other farms in that county.

POULTRY

WATCH WEIGHT OF PULLETS FIRST YEAR

Frequent Checks Should Be Made of Progress.

By C. O. Dossin, Poultry Department, Pennsylvania State College.—WNU Service.

Pullets should gain in weight during the first laying year. Some poultrymen make a practice of marking a few pullets and then weighing these same birds every week or two through the fall months to keep a check on the birds' weight. Others just catch a few of the birds occasionally and handle them for weight and amount of flesh on the breastbone.

If one has occasion to go into the hen house at night after the birds are on the perches, that is also a good time to check on the birds' weight and condition. Another good time to note the amount of flesh on the breast is while removing the eggs from underneath the pullets in the nests.

If the pullets lose weight, there is a good possibility of their going into a molt. To maintain body weight or to increase it, feed more to the birds. Give all the scratch feed the birds will eat at night and about one-half that amount in the morning. Keep dry mash before the birds at all times. Filling the feeders with fresh mash each day will encourage greater mash intake than when the feeders are filled once or twice a week. Stirring up the mash in the feeders occasionally also helps.

The use of lights in the hen house to lengthen the working day of the birds will increase feed intake. A 13 or 14-hour day will meet the requirements of the average flock.

Two Principal Methods of Finishing Poultry

There are two principal methods of finishing poultry—pen-feeding and crate feeding. The former method is generally used for turkeys and waterfowl, the latter for chickens of all ages. Some feeders follow the practice of pen feeding for a couple of weeks and then "finish off" in crates. Batteries are commonly used in intensive plants, but for ordinary farm use crates are equally satisfactory and are inexpensive. The quarters where the birds are to be "finished" should be dry, cool and well ventilated, and the birds should have quiet and freedom from excitement.

The general purpose or heavyweight breeds are best suited for crate feeding and best results can be expected only where strong, vigorous, sturdy type birds are used. Before starting the finishing period, the birds should be dusted with flowers of sulphur or some other suitable preparation to insure their freedom from lice.

Lice Halt Laying

Practical poultrymen know that an infestation of lice can quickly throw a normal and healthy flock out of production. Of course, there are other causes which will interrupt steady laying, but when your flock suddenly begins to slack down in production, it is wise to look immediately for lice. If they are present you probably have found the cause of trouble—and you can quickly eliminate it. Many poultrymen do not wait for lice to appear but dust their poultry houses as a preventive. This, of course, is a help rather than a curative treatment—but it certainly is worth while when one takes into consideration the loss caused by even just a few days loss of production.

Feed Seaweed

Scientists at Cornell university, occupied with discovering a better, more effective cure for goitre, went to the sea and gathered therefrom great quantities of seaweed. A flock of hens then were taken to coops and were fed the "sea spinach." The "sea spinach" abounds in the particular type of iodine that is the enemy of goitre, and eggs from these specially fed hens were found to contain 500 times as much iodine as ordinary eggs. The scientists further decided that what's good for hens is good for cows. Several heifers, too, were fed "sea spinach." Milk contained more of the valuable important iodine.

Geese Are Profitable

Abundant pasture of a sort that is tender and remains green for a long period is the most economical basis for the raising of geese. A stream or pond, or even tanks of water may serve for the aquatic needs of the birds, and shelter may be reduced to a minimum. In the South none is required and in the North a simple shed open to the south is sufficient. Geese can be raised successfully and profitably in all parts of the United States, but are more abundant in the Middle West.

Inspections have shown that if glasses at roadside stands are properly washed there may remain 50,000 to 100,000 bacteria on a glass.

ADDITIONAL LOCALS

Paul Carpenter, Extension Specialist in Marketing at O.S.C., conferred with Assistant County Agent W. A. Sawyer and members of the board of directors for the Farm Bureau Co-operative Monday of this week. He expects to return within the next four weeks for another conference.

Mrs. W. A. Sawyer expects to accompany her husband to Corvallis Sunday where he will spend the next two weeks at 4-H club summer school, and she will visit her parents at Ashland, Oregon.

Miss Mary Petri, third grade teacher in the local schools, left Wednesday morning for Portland where she will spend part of her vacation.

Mr. and Mrs. O. O. Felthouse left Wednesday morning for East Lake near Bend, Ore., where they expect to spend the remainder of the week fishing.

Mr. and Mrs. Paul Van Patten were awarded the Crosley radio given by the Oasis theatre Wednesday night.

Mr. and Mrs. Victor Addleman are the parents of a baby girl born Wednesday, May 27th. She has been named Shirley May. Mrs. Addleman will be known as Dorothy Conrad who was a student in the local high school. The young couple have kept their marriage a secret for more than a year.

Miss Lola Osborn of Heppner is the house guest of Marion Pierce for the next two weeks.

Geo. Harper who lives one mile west of town, harvested his new seeding of alfalfa this week and reported that the yield was two tons to the acre.

Father's Day is June 21st. Buy greeting cards and gifts at Amsherry's.

Dulcinea May Panages, daughter of Mr. and Mrs. T. G. Panages, is visiting her aunt and grandfather D. M. Rogers in Pendleton this week.

D. M. Rogers and daughter and her husband, Mr. and Mrs. F. J. Buskirk of Pendleton visited the T. G. Panages family Saturday evening in Columbia district.

Miss Esther Sibert, accompanied by Floyd W. Cook, who went to his home at Cheney, Wn., left Tuesday for her home in Elberton, Wn. Miss Sibert taught in the commercial department of the local high school and Mr. Cook instructed the eighth grade.

Mr. and Mrs. E. L. Barnes of Portland arrived Monday and will spend the next two weeks with Mrs. Barnes' parents, Mr. and Mrs. N. W. O'Donnell. They are taking their annual vacation.

Miss Eunice Woughter returned this week from Eugene where she attended the commencement exercises at the University of Oregon at which her sister Miss Helen Woughter received her degree in business administration.

Miss Margaret Elliott, English instructor in the high school here for the past six years, left Wednesday morning for her home near Astoria. She will teach senior English in the Hood River high school next year.

Mr. H. B. Sullivan and son Pat of Roseburg, Ore., is visiting here and at the Chas. Baker home in Stanfield this week. She is a sister of Mrs. Grace Rice who is employed at Hunter's Cafe.

Miss Rachel Sloan of Stanfield was in Hermiston Tuesday returning from Dufur, Ore., where she has taught the past year. Miss Sloan expects to teach at Clatskanie next year.

Mrs. J. H. Ryland entertained Tuesday afternoon honoring her daughter Beulah on her ninth birthday, at her home in Columbia district. She was assisted by Mrs. P. H. Corman and Mrs. Wm. Luttrell. Among the invited guests were Rose, Louise and Teddy Pelletier, Gail Hugg, Rosemary Keller, Bobby Eaton and Adila Cheetwood.

Mr. and Mrs. E. C. Schofield, who have been visiting Mrs. Schofield's parents, Mr. and Mrs. W. J. Warner for the past week, left for their home in Vancouver, Wn., Sunday. Their daughter Patricia and son Edward remained with their grandparents for a visit.

Mrs. W. L. Hamm and Mrs. G. W. Ripley were joint hostesses Wednesday afternoon when they entertained the officers club of the Eastern Star at the home of Mrs. Ripley.

Mr. and Mrs. Otis Jordan of Pendleton were guests of Mr. and Mrs. J. W. Douglas Sunday. Mrs. Jordan is their daughter.

Mr. and Mrs. Maurice Weis of La Crosse are house guests of Mrs. Weis' parents, Mr. and Mrs. Chas. Clark. They came Friday and Saturday were accompanied to Portland by Mrs. Clark and daughter Arlyn. They remained in Portland until Wednesday.

Members of the Hermiston and Echo Epworth Leagues, accompanied by their pastor, Rev. R. R. Finkebeiner, motored to Walla Walla Saturday where they visited the Marcus Whitman monument and the state penitentiary. This is the centennial year for Whitman.

Rev. W. S. Glesser of Pendleton attended the fourth quarterly conference of the Methodist church here Tuesday evening, which is the final business meeting for the season.

Miss Charlotte Ralph motored to Vancouver, Wn., Sunday where she visited Mr. and Mrs. E. C. Schofield until Thursday, when she went to Corvallis for her sister Miss Betty who is a student at Oregon State college. Both girls returned to their home here Friday.

30 MILES from NOWHERE IS NO PLACE for TIRE TROUBLE

Safeguard your Holiday Trip with dependable long-wearing U.S. TIRES

Plan now to safeguard your holiday pleasure and insure a safe trip... by replacing worn tires with dependable, long-wearing U. S. Royals. Protect yourself from high-speed blow-outs with exclusive "U.S." safety ply construction...

Protect yourself from skidding with U. S. Cogwheel Tread... and protect your pocket-book too, with tough, long-wearing Tempered Rubber. These holiday prices may not last. Be wise... save money... by taking advantage of them today.
