**McCORMICK-DEERING—**  
the ONLY Cream Separator with  
**STAINLESS STEEL DISCS**  
with Electrically Welded Stainless Steel Spacers

Stainless Steel Discs—this amazing improvement in cream separators is another triumph for McCormick-Deering. Here is a cream separator that brings to your milk room the same positive assurance of cleanliness, sanitation, and safety that you demand of kitchen equipment.

Stainless Steel Discs are absolutely rustproof. They are made of tough, strong, closely grained metal that will stay the same for years—

there is no soft coating to wear away. As a result, the bowl in the McCormick-Deering will remain in balance a great deal longer than one having ordinary tinned carbon-steel discs.

Call on us for a demonstration—see this latest and greatest achievement in McCormick-Deering Cream Separators.
