THE MAYTAG SEDIMENT TRAP makes clothes cleaner!

When Maytag introduced the cast-aluminum tub washer, with Gyrotator washing action, new speed and gentleness were brought to home washing. But there is another reason why a Maytag makes the clothes so clean and white. It is the sediment trap underneath the Gyrotator in the bottom of the tub. The grit and grime collect in this trap, instead of being washed back into the clothes. This is just one of many advantages which won world leadership for the Maytag. Each week a Maytag creates savings to help provide the easy payments. Any Maytag available with gasoline Multi-Motor.
