To clear up the new park situation it is necessary for local citizens to loan \$25 to \$100 each to a total amount of \$1500 in certificates payable when funds are available. This will assure the full expenditure of the new allotment of \$12,000 from WPA in labor on the grounds and the completeness of this recreational center.

Do not forget that the new park will be a really recreational center and will attract people for 50 miles around to make use of the golf course, race track, and to attend gatherings at the community hall and at the Umatilla Project fair. It will be the largest park in eastern Oregon. Highways radiating from it lead to all parts of Oregon. Hermiston should take great pride in this wonderful attainment.

Tree planting has grown into a national program. Our assistant county agent has orders for 24,000 trees which shows that people are giving serious consideration to the importance of windbreaks, wood lots shade and landscape. Soil erosion prevention is just as important here as in many other districts.

The slogan "Take Oregon out of the mud," gave the strongest impetus to highway building west of the Cascades years ago. "Take our project out of the desert with trees" is just as appropriate.

"Bulldogs to Salem" should be our slogan for another year. The boys can keep this in mind while training during the vacation.

AAA SETS SEED STANDARD

Use of seed adapted to the conditions for which it is sown will be an essential in participating in this year's agricultural conservation program, it is announced by the state committee in charge in Oregon. In line with a national policy adopted, the state technical committee has recommended specific requirements in alfalfa and clover seeding, pasture grass seeding and related crops, where soil building payments are sought.
No payments will be made this year in Oregon for seeding alfalfa seed obtained from southwestern states, or that imported from Argentina or South Africa, it is announced. No imported red clover seed is to be used except that from Canada.
Pasture grass restrictions will include the elimination from consideration of seed that contains noxious weeds, and mixtures must be such as give reasonable assurance of success in the district where seeded.
Those in charge of the program point out that the rules are such as to give every consideration to the cooperator who does everything possible from his standpoint and then suffers a crop failure. Payments are still permissible in such cases. The use of poor seed at the start, however, invites failure and is not evidence of good faith, it is held.

1939 World's Fair
Has New Ideas About Amusement Features

NEW YORK, (Special).—"Only seeing will be believing," says President Grover Whalen of the New York World's Fair 1939 Corporation, as he tries to envision what the Fair is planning, more than two years in advance, in the way of facilities for recreation entertainment and amusement.
"Every man, woman and child in the United States, he says, has an interest in the 1939 Fair and to some degree or other has a part in the building of that Fair. The exposition, therefore, will surpass all previous fairs, not only in the demonstration of the wonders of the world or present-day life and in the projection of the World of Tomorrow, but also in providing the utmost variety of entertainment and amusement for every man, woman and child.
The entire world will be tapped for every amusement possibility. The tiresome mediocrity of stunts and side shows—the stock-in-trade relics of the amusement world of yesterday—will give way to a new and modern standard of excellence. The plan of the New York World's Fair has anticipated the requirements for entertainment and is making them a part of the general scheme of the Fair, rather than allowing them to spring up as an afterthought or an afterthought. Ever the tiny children will have a playground reserved exclusively for their own use.

CHURCH NOTES

CHRISTIAN SCIENCE CHURCHES
"MAN" was the subject of the Lesson-Sermon in all Churches of Christ, Scientist, on Sunday, March 7.
The Golden Text was, "Ye are my witnesses, saith the Lord, and my servant whom I have chosen" (Isa. 43: 10).
Among the citations which comprised the Lesson-Sermon was the following from the Bible: "Blessed is the man that walketh not in the counsel of ungodly, nor standeth in the way of sinners, nor sitteth in the seat of the scornful. But his delight is in the law of the Lord; and in his law doth he meditate day and night" (Ps. 1: 1, 2).
The Lesson-Sermon also included the following correlative passages from the Christian Science textbook, "Science and Health with Key to the Scriptures," by Mary Baker Eddy: "Man in Science is neither young nor old. He has neither birth nor death . . . Even Shakespeare's poetry pictures age as infancy, as helplessness and decadence, instead of assigning to man the everlasting grandeur and immortality of development, power, and prestige . . . The perfect and immortal are the eternal likeness of their Maker . . . Man, governed by immortal Mind, is always beautiful and grand. Each succeeding year unfolds wisdom, beauty, and holiness" (pp. 244, 246).
