Hermiston and all other localities are looking forward to the Fourth of July two day celebration at Stanfield. The Stanfield community is making great preparations to entertain the people of all this region and they deserve the attendance and support of everybody. Many interesting events are being planned to make the celebration an unusual occasion of this kind.

Finally the long promised Rural Electrification program is definitely underway. The money is available. Official have been selected, the present board has the matter well in hand and the national REA has placed its stamp of approval firmly on this development in the interest of the rural population. In Oregon only 30 per cent of the

farming population is served by electric lines and this state is being well favored by the national administration in a matter of such great importance to home building on the farm. In this territory the fact that the work is being done according to the regular cooperative system is pleasing to the local farmers where we are known as the most cooperative community in the entire north-west.
