McCormick-Deering Engines
Work for You the Year Around

● Changes of seasons don't affect the usefulness of McCormick-Deering Engines, built in 1 1/2 to 2 1/2 and 3 to 5 h.p. sizes. They work for you the year around - for pumping, sawing, grinding, separating, operating the milker, doing the washing, etc. Equipped with a ventilated, all-weather magneto and hand-control speed lever, they start easily and operate economically. They are small, compact, and easy to transport, and are completely enclosed and protected so that snow, rain, dirt, or dust cannot affect their operation. Ask us to demonstrate the new McCormick-Deering Engines.

Here is the 1 1/2 to 2 1/2 h.p. engine equipped with the McCormick-Deering Enclosed-Gear Pump Jack.
