Canned Foods are "Nature-fresh."

*America's contribution
to fine living...*

Today's housewives appreciate the amazing short-cuts that
canned foods bring to the kitchen—thanks to modern
canning methods and the fertile lands of the Golden West. Delicious fruits and vegetables,
picked at the peak of their natural goodness, packed in containers by methods which retain
their flavor and freshness—tasty tuna and salmon straight from the ocean or rivers—flavorome
preserved meats prepared under government supervision—rich condensed or evaporated milk
from cows pastured on the west's abundant fields!

All these splendid foods—and many more—are available the year round at your neighbor-
hood store as nature-fresh as the day they were sealed, in tin or glass, because modern methods
of preservation keep them so!

The progressive Union Pacific Railroad plays an important part in serving western canners
and eastern consumers. Cans and jars are sturdy containers, but Union Pacific treats them
with the same care it gives to fragile commodities. In winter months, shipments are protected
by heater service, and by refrigeration in hot summer weather. Prompt, safe, dependable
transportation every day, every year. Last year Union Pacific
moved nearly a half million tons of canned food products
to America's markets.

Ask your neighborhood grocer for nature-fresh canned foods!
