

AMAZING NEW SAFETY TIRE

STOPS CARS 4 to 223 FEET QUICKER

STOPS QUICKER
When brakes are applied the "De-Skidded" tread cuts up into action... hundreds of sharp gripping edges bite through the slippery surface film... enable the flexible tread units to solidly grip the pavement.

ONE-MINUTE TEST SHOWS YOU HOW ROYAL MASTER MAKES THESE QUICKER STOPS POSSIBLE

ROAD TEST STOP IN 10 FEET	ROAD TEST STOP IN 11 FEET	ROAD TEST STOP IN 12 FEET
4 FEET QUICKER	7 FEET QUICKER	10 FEET QUICKER
ROAD TEST STOP IN 15 FEET	ROAD TEST STOP IN 16 FEET	ROAD TEST STOP IN 17 FEET
7 FEET QUICKER	11 FEET QUICKER	223 FEET QUICKER

CONTROLS SIDE SKIDS
When the weight of the car suddenly shifts to the side, its twisting corners, pivoting axles, etc., the sharp lateral edges of the seven continuous ribs go into action, instantly bite through the film and gain a direct positive foothold on the road.

We invite you to see the new safety of this De-Skidded tire proved before your eyes. Learn in one minute how it stops quicker... controls dangerous side skids. Come in today. No obligation.

WHEN THE HIGH LINE COMES

By Frank J. G. Duck, Secretary Rural Electrification Bureau.

PART V

For general illumination, all bedrooms should have a center ceiling outlet operated by a wall switch at the entrance. Supplemental light should be provided for the vanity or dresser, preferably from table rather than bracket lamps. The former can be attached to convenience outlets and controlled at the lamp socket. Protection as well as convenience makes it advisable to install a three-way switch in the master bedroom to control the yard lights.

In addition to those already mentioned, convenience outlets also should be located near the head of the bed for a reading lamp or heating pad. If the room is large, a few additional outlets will permit the more easy use of a vacuum cleaner.

Bracket lights, on opposite sides of the mirror, as well as a center ceiling unit, should be provided in the bathroom; the latter operated by a wall switch, the former at the fixtures. In small rooms, bracket lights controlled by a wall switch probably will furnish adequate illumination.

To prevent corrosion from moisture, all light sockets should be of porcelain or composition material.

A special non-metallic (Bakelite or other similar material) safety type duplex outlet should be installed near the wash basin for dry shaver, curling iron, immersion heater, milk bottle warmer, hair dryer, health lamp and like appliances. An ordinary convenience outlet may be provided for a portable heater. The special safety outlet should be placed as far from the bath tub as possible—both its location and material being such as to reduce to a minimum the danger of electrical shock while the body is in contact with water.

An open attic requires only a central lighting fixture attached to the gable of the roof. If completely finished, the lighting and outlet requirements will depend upon the use which is to be made of the various rooms. In either case, the principal light should be controlled by a wall switch at the foot of the stairway to the attic.

It is essential that a light be properly placed to fully illuminate the stairway to the basement. This should be operated by a wall switch, with pilot signal, located at the head of the steps. Other lights, preferably placed near the ceiling

and fitted with covered reflectors, can be controlled by a single switch at the foot of the stairs. If there are two entrances to the basement, a three-way switch should be installed at each door. Porcelain or composition light sockets should be used here as in the bathroom.

Enough properly-placed convenience outlets, preferably located in the ceiling to keep the connecting wires dry, must be installed to operate the washing machine, ironer, small electric tools and other appliances. If a water heater, water supply system, oil burner, stoker or air conditioner is installed, a special circuit must be provided for each piece of equipment.

If the basement is finished and divided into several rooms, the lighting and outlet needs will vary with the use to be made of each. Your electrical contractor will advise you regarding any special or unusual requirements.

As the garage frequently is attached to the house, it will be considered here. A light on the outside, controlled by one switch inside the doorway of the garage and another at the most convenient entrance to the house, is necessary to illuminate the driveway. Two RLM standard dome reflectors (to be discussed later) should be installed at the ceiling—one over the usual position of the car engine and the other over the work bench (the same type of fixture also should be employed over the work bench in the basement of the home). These lights should be operated by three-way switches, one located at the nearest entrance to the house, the other at the main doors to the garage.

At least one duplex convenience outlet should be located on the wall above the work bench. This will not only permit the use of electrical tools but also a trouble lamp and battery charger.

REA LINES EXTENDED TO PINE CITY

PINE CITY NEWS—E. P. Dodd and Edgar Saylor of Hermiston were on the creek Monday securing easements for the REA power line which will be extended to Pine City by the Umatilla Electric Cooperative association.

A ten pound baby daughter was born to Mr. and Mrs. Jasper Myers Easter morning at the Hermiston General Hospital.

Lowell Young left Thursday for Shoshone, Idaho, for an extensive visit. Mr. and Mrs. Bill Ross, who came back from the east are working at the H. E. Young home during his absence.

People on the creek who were ill with tonsillitis the past week are Mr. and Mrs. E. B. Wattenburger and Mrs. John Harrison.

ing from her illness, is now confined to her bed again.

Mr. and Mrs. W. J. Wattenburger of Echo were dinner guests Friday at the A. E. Wattenburger home.

Miss Patricia Daly spent Monday afternoon in Pendleton.

Mrs. J. S. Moore has recently purchased five hundred baby chicks which she is busy taking care of.

Mr. and Mrs. W. D. Neill, Charles Bartholomew and Mr. and Mrs. R. E. McGreer were Pendleton callers Saturday. The men's interest was the meeting about the sheep shearing strike.

Mrs. Ruby Miller of Pilot Rock and Duke Schiller were callers at the John Harrison home Sunday.

Frank Helms had the misfortune of cutting his thumb on a saw Monday.

Mrs. Mabel Rauch is employed at the John Harrison home during Mrs. Harrison's illness.

Mrs. Joyce Smith and Miss Dora Moore were dinner guests at the Barton Clark home Wednesday.

Mrs. Sarah Doherty and family visited at the Jim Daly home over the week end.

(Too late for last week)

The Pine City high school will present a carnival and play Friday night, May 6. The name of the play is, "It Pays To Be Clumsy," and rehearsals are going nicely. A good time is assured to all those who participate in the fun.

Many people from Butter Creek attended the funeral of Jake Wattenburger at Echo Saturday.

Last Sunday, Mr. and Mrs. Joe Doherty and son Jerry visited Mrs. Doherty's brother, John J. McCauley, who is working at the Coaylen ranch. They also called at the Jim Daly and John Healy homes.

Mrs. Gladys Beck of Pendleton spent the week end at the John Harrison home Thursday.

Harold Neill and Miss Helen Pierson of Hermiston called at the W. D. Neill home Sunday.

Mrs. John Healy and son Jack and daughter Cecelia visited at the Killkenny home Sunday.

Miss Neva Neill and Mrs. Dale Akers and daughter were visitors on the creek Thursday.

Guy Moore and Jack Healy were at their homes on Butter Creek last week. They both visited at the Pine City school Friday afternoon.

Mrs. Joyce Smith of Pine City spent the week end at her home at Irrigon.

Mr. and Mrs. Floyd Mathers and son spent Sunday at the W. D. Neill home.

Mr. and Mrs. Wm. S. Bennett of Heppner visited at the John Healy home Sunday.

Mr. and Mrs. C. H. Ayers and family were at the E. B. Wattenburger home Sunday evening.

John Harrison and Mrs. Robert McGreer were at the E. B. Wattenburger home Friday.

Mrs. George Currin was a visitor at the home of her sister, Mrs. John Harrison Thursday.

BEST IRRIGATION SEASON INDICATED

Moisture conditions throughout Oregon are not only the best in many cases in the last decade, but prospective stream flow and abundant supplies of water in reservoirs make certain the best irrigation season in years, according to the April report on the snow surveys and irrigation water forecasts for Oregon.

This report is issued from the Medford branch experiment station, which is the headquarters for the cooperative work by which measurements are kept on some 75 snow courses in Oregon, from which calculations and forecasts are later made.

Every one of Oregon's 17 principal irrigation storage reservoirs is either filled beyond the level noted last year at this time, or has been purposely allowed to remain only partially filled as a means of flood control later in the season. Stream flow throughout the state for the coming summer is forecast to be materially better than last year, with the exception of the Umatilla-Walla Walla basin. Although winter runoff has been heavy, thus permitting more water in the McKay and Cold Springs reservoirs, snow fall in this one region is less than usual, which will affect the late season flow.

In other sections of the state, snow supplies are greater than usual in the higher elevations, and in addition the soil under the snow is generally in an unfrozen, water-soaked condition, as contrasted to the dry and frozen soil on which last year's snow lay.

Arch Work, superintendent of the Medford station and head of the snow survey work carried on by the United States bureau of agricultural engineering and cooperating agencies, recently completed the third annual series of regional meetings throughout the state for the consideration of data gathered this past winter. These meetings were held at Klamath Falls, Prineville, Canyon City, La Grande, Pendleton and Portland. Most of the cooperating agencies were represented at these round table discussions, where forecasts for each region were agreed upon.

Wade Crawford
DEMOCRAT
Candidate for Representative from the 2nd Congressional District.

My ten years' experience with the Legislative and Administrative branches of the National Government and personal acquaintance in Congress will be invaluable as your Representative. I shall work for the development of the Columbia river & delivery of its power resources to the people at the lowest possible charge.

I am a charter member of Williamson River Grange and helped organize it. I have made an intensive study of grazing and reclamation and have had experience in working out the difficult problems of both.

COLUMBIA PARK CLEAN-UP HELD

COLUMBIA NEWS—The annual clean-up day at Columbia park was supervised by the Farm Bureau park board Friday. The Farm Bureau Auxiliary furnished a fine potluck dinner for the twenty-two present.

Mr. and Mrs. William Luttrell, former residents of this district but now of Portland, arrived here Monday and were greeting friends. They will spend two or three days attending to business affairs.

Mrs. H. E. McCulley has been ill at her home for the past week with the flu.

Mrs. Lawrence Harte and son Dick arrived Saturday evening from their home in Gaston, Ore., to spend Easter with Mrs. Harte's parents, Mr. and Mrs. Claude Upham. They returned home Wednesday.

Mrs. Ora Thompson, who has been ill for some time, is reported as improved.

Orbie Wells has gone to Pendleton for a week. Mr. and Mrs. Charles Wells are at the Orbie Wells home. Mr. Wells is looking after the place during his father's absence.

Mr. and Mrs. Claude Upham, Mrs. Lawrence Harte and son Dick attended Easter services in Pendleton.

Mr. and Mrs. F. Lenz and son Fritz, Mr. and Mrs. Gus Linder, Mr. and Mrs. Joe Udey, Mrs. T. E. Sink, Mrs. F. R. Moore motored to Milton Saturday evening to hear Judge Summers who spoke in behalf of the Townsend club.

Bobby Eaton spent Easter vacation with his parents, Mr. and Mrs. Dallas Eaton of Freewater.

Mr. and Mrs. Otis Buell and family

OREGON LEADS IN PLANNED FARMING

Oregon's plan of holding economic outlook conferences periodically to keep the state's agricultural production in line with market demands is attracting a great deal of national attention, reports E. R. Jackman, extension agronomist, who has just returned from Washington, D.C., where he assisted in making plans and regulations for the AAA wheat loans under the ever-normal granary plan.

While Oregon farmers have been following this planning procedure for 14 years, most other states are just now making a beginning in this field, Jackman reports. As an indication of the nation-wide interest in this subject, F. L. Ballard, vice-director of the Oregon extension service, was asked to prepare a feature article on the subject which will appear as a leading article in the May issue of the Country Gentleman.

Mr. and Mrs. Theodore Panages and family and Mrs. Nellie Tucker spent Easter with Mrs. Tucker's son and family, Cecil Rogers of Stanfield.

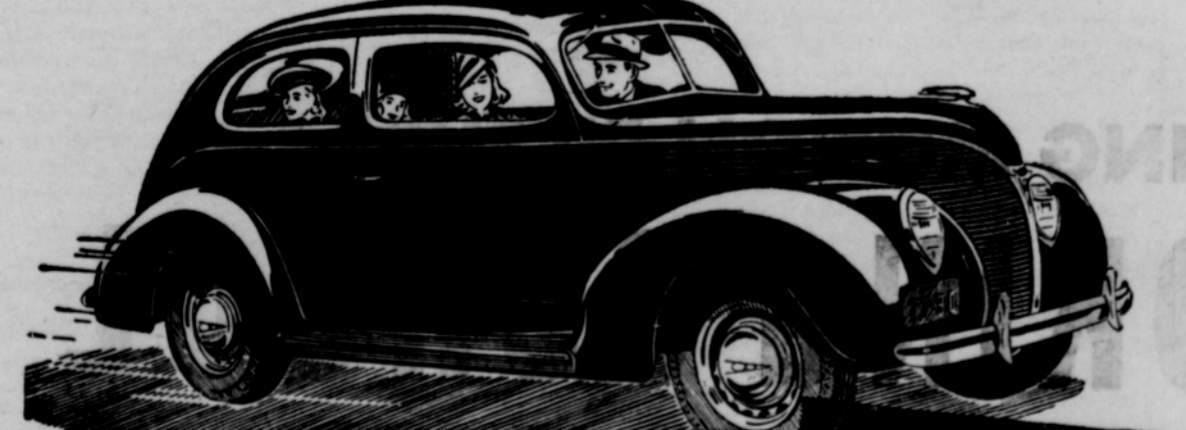

Shirley Stockard returned to his work at Bly, Ore., Saturday after a visit with his parents, Mr. and Mrs. R. H. Stockard.

Albert Shipp is confined to his home with pneumonia.

Mr. and Mrs. Charles Epperson took Mr. Jeppe, father of Mrs. Epperson, to Pendleton Wednesday of last week when he left for Montana for a few weeks visit with his son.

EVERYTHING "WHY PAY MORE?" ABOUT IT SAYS

NOT JUST IN BRILLIANT STYLE... BUT IN ROOMINESS AND RIDING COMFORT... LOW PRICE HAS NEVER BOUGHT SO MANY FINE-CAR SATISFACTIONS BEFORE

DE LUXE TUDOR SEDAN... 112-inch wheelbase, 123-inch springbase, 85 h.p. ... Diagonal folding of front seat back gives easy access to rear ... Luggage compartment reached from outside ... Mohair or broadcloth upholstery.
