**BOARDMAN**

By RUTH FISHER  
The Boardman Yellowjackets defeated the Echo basketball team in a game played at Echo Tuesday evening. The score was 53 to 13 in favor of Boardman. The Boardman second string won over the Echo seconds 17 to 16.  
Mike and Bob Gorham are visiting at the Jack Gorham home over the Christmas holidays.

The first snow of the season fell at Boardman last Sunday night. The Irrigon high school basketball team defeated the Boardman team last Saturday night, in a game played in the local gym. The score was ten to five in favor of Irrigon.

The community Christmas program was given in the school auditorium Wednesday evening with a large attendance. Santa Claus passed treats following the program.

The Christmas program will be given Friday at the Community church.

Members of the Boardman Grange went to Irrigon Saturday night to the installation service.

**PRIMARY GRADES WILL GIVE OPERETTA**

**CHRISTMAS SPIRIT PREVAILS**

(From the Bulldog)  
"Susanna's Christmas Auction," an operetta in two acts, was presented by the first four grades under the direction of Miss Burnett, Miss Petri, Miss Kirk, and Miss Harmon, Thursday night.

The synopsis of the operetta is as follows: It is Christmas Eve in Susanna's home, where she lives with her father and mother. As the curtain rises, a squad of Toy Policemen enter from the fireplace and march about. They have come to see that nothing has disturbed things arranged for a Christmas Party. A little dog comes in and yips fiercely at them. They are afraid of him. Santa Claus comes in and settles the quarrel, and all become good friends, after which Santa and his helpers disappear up the chimney.

**WANT ADS**

1c a Word - Minimum 20c

FOR SALE — EASTMAN \$25 KODAK. Special price, \$10. See it at the Herald office. 18-1tp

FOR RENT—FURNISHED APARTMENT for housekeeping. Electric stove and modern. Phone 78-R. Joe Dyer. 50-tfc

night she climbs on a chair and breaks a very beautiful vase which her father got for her mother. She will not say she is sorry, so her parents decide that she must pay for her naughtiness. They arrange to have an auction sale the following day, at which they will sell all her toys.

Aunt, uncle and cousins come to the auction and one by one, Susanna's treasures are disposed of. When her Josephine is put for sale, she breaks down and asks pardon for what she has done. Then she makes up her mind that she will be better in the future. Santa Claus comes again to distribute the presents and gives Susanna another fine doll. Her father returns the article which was in the mysterious package to Santa, saying, that Susanna will not be needing it anymore. Everybody feels happy that naughty Susanna has "turned over a new leaf," and they sing a joyous finale.

**Land Sale Notice.**

NOTICE IS HEREBY GIVEN, That the undersigned, Sheriff of Umatilla County, Oregon, by virtue of an order duly made and entered herein by the County Court of Umatilla County, Oregon, on the 21st day of October, 1938, will, on the 24th day of December, 1938, at the hour of 10 o'clock in the forenoon, sell to the highest bidder for cash in hand, at the front door of the Umatilla County Court House, Pendleton, Oregon, subject to a minimum price of \$28 therefor, to be paid in cash, at the time of sale, the following described parcel of land, heretofore by Umatilla County, Oregon, acquired for delinquent taxes, to-wit: All Block 12, Newport's Addition to City of Hermiston, Umatilla County, Oregon.  
R. E. GOAD, Sheriff  
Umatilla County.  
(Nov. 24-Dec. 22)

**NOTICE!**

To Umatilla Project Farm Bureau members:

The annual meeting will be held, Wednesday, December 28th, at 8:00 p. m., in the basement of the M. E. church. The rear entrance will be opened for use.

A report of the year's activities will be given, future program suggested, officers elected, entertainment provided and refreshments served. Every member urged to come.

H. J. Ott, Chairman.

**OSC CONFERENCE DIRECTS THOUGHT ON FUTURE NEEDS**

A thorough consideration of Oregon's rural life needs, in which experiment station, extension service and resident instruction staff members all joined, featured the annual conference of agricultural and home economics workers of Oregon at Oregon State college late in December. The occasion was also one for hearing from leaders from other states in this field and for recognizing outstanding achievements among Oregon workers. Wm. A. Schoenfeld is dean of the combined service.

Miss Lois Lutz, home demonstration agent of Lane county, was elected head of the Home Economics Extension Workers organization for the coming year, while George Jenkins, county agent in Coos county, was named president of the County Agents association.

Frank L. Ballard, vice-director in charge of the extension service, was the recipient of a certificate of recognition from Epsilon Sigma Phi, the national honor society for extension workers. He received one of only four such certificates awarded in the western states this year. He was praised by fellow workers for his outstanding success in administering extension work in Oregon and for having unified all branches of extension work in pursuit of a coordinated program to improve rural homes and rural living standards.

Members of the extension staff elected to Epsilon Sigma Phi, all of whom have had 10 years or more connection with the extension service, are Mabel Mack, home demonstration agent of Jackson county, and five county agents—LeRoy Wright, Sherman; Robert Knox, Curry; A. L. Marble, Hood River; W. A. Holt, Umatilla and Vic Johnson, Lake.

The principal outside speaker at the conference was Dr. E. F. Dummer, professor of economics at Washington State college. Dummer discussed the principle of international trade and pointed out that the Pacific northwest has a greater stake in the continuance of foreign trade than any other agricultural section with the possible exception of the southern cotton growing regions. He endorsed the principle of the reciprocal trade agreements.

**FARM PROGRAM CLOSING DATE SET**

January 15 has been set by the western division of the Agricultural Adjustment Administration as the final date upon which new work sheets may be accepted for the 1939 program, according to word just received by the Umatilla Agricultural Conservation Association. The association is particularly anxious that farmers throughout Umatilla county be advised of this point in order that no one interested in taking advantage of the program may find themselves unable to comply through failure to sign a work sheet.

It has been the experience of the association during recent weeks that several farmers have come to the office of the Conservation Association in the interest of crop loans, insurance and so forth, and found themselves unable to take advantage of these features of the Adjustment Program for the reason that they had not cooperated in the program for 1938. The committee points out further that should the establishment of marketing quotas be put into operation due to the production of an excessive large wheat crop, persons not under the program for 1939 might find themselves placed at some disadvantage to comply with this work sheet requirement of the AAA. Persons need but indicate to the county association at Pendleton their wishes to come under the program for 1939, this indication of interest to be made prior to January 15th.

**FARM CO-OPERATIVE DIVISION**

A MESSAGE TO EVERY MEMBER.

**OSC SCIENTISTS ISOLATE SHEEP DISEASE BACTERIA**

Four kinds of bacteria which cause diseases of Oregon sheep have been isolated in this state for the first time as a result of the two-year study of diseases in range livestock made possible by special appropriation of the last legislature. A brief report on this research is contained in the illustrated circular 130, "Special Agricultural Investigations," recently published by the experiment station to give preliminary results of 21 projects authorized by the last legislature.

Four diseases for which causative agents have been found are stiff lamb disease, a pseudo-tubercular disease which is associated with lung disease of sheep, the "sudden death" disease of Curry county lambs, and the black disease which also causes quick death. With these four definite causative agents now known, rapid progress should be made in finding satisfactory remedies and methods for prevention, believes J. N. Shaw, head of the veterinary department at Oregon State. Some progress has already been made in the way of control particularly in connection with the losses among Curry county lambs and with a non-infectious pregnancy disease.

Bacteriological studies of lambs dying suddenly in Curry county revealed an organism similar to, if not identical with, that responsible for a disease of lambs in British possessions and a disease occurring in Texas. Antitoxin was obtained from these two regions which, when used in Curry county, resulted in reducing losses to less than 15 per cent of losses occurring where the antitoxin was not used.

**TO PUBLISH SPECIAL EDITION OF "COOPERATIVES IN AMERICA" BY ELLIS COWLING**

(Co-op League News Service)  
New York — The Cooperative League of the U.S.A. announced today that it has arranged for the publication of a special edition of "Cooperatives in America" by Ellis Cowling which was published by Coward-McCann early this fall.

Mr. Cowling's book is a description of the consumers cooperative movement in the United States today, prefaced by a history of the growth of the cooperatives which grew out of the economic conditions precipitated by the Industrial Revolution a century ago. The special edition of "Cooperatives in America," to be published December 23, will be available to members of co-ops for \$1 per copy.

**PORTIONS OF FARM OUTLOOK FOR 1939 AS PUBLISHED BY U.S. DEPT. OF AGRICULTURE**

(Continued from page 4)

**Larger Output of Butter, Cheese, Canned Milk.**

The output of the principal manufactured dairy products in the first 8 months of 1938 was 9 per cent larger than the heavy production of a year earlier. Creamery butter production was up 8 per cent, cheese 12 per cent, and evaporated milk 11 per cent. Consumption of these products, on the other hand, apparently was about the same. Storage stocks increased rapidly to new high levels.

On an annual basis the consumption of manufactured dairy products in the United States is about the same as production. Imports and exports are relatively small. There is little or no tendency to carry over stocks from one storage season to the next. Thus, the large stocks now on hand will mostly be moved into consuming channels during the remainder of the storage season, which ends about May 1.

The consumption of butter in 1936 and 1937 averaged 16.7 pounds per capita. This was 9 per cent less than in 1934, and 5 per cent less than the 1924-29 average. Changes in consumer incomes and payrolls affect the price of butter but have little or no effect on the annual volume of consumption. What is produced is consumed.

The consumption of butter probably will increase from the relatively low level of the last few years. During the last 35 years, there has been no consistent tendency toward either increase or decrease in the per capita production and consumption of butter.

**Morrow County Pomona.**

Morrow County Pomona Grange will meet at Irrigon, Saturday morning, January 7th. The public is cordially invited to attend the program at 1:30 p. m. The fifth degree will be conferred in the evening by the Pomona officers.

**BUILDING GAINS OF COLLEGES ARE SHOWN IN REPORT**

ALBANY—The state board of higher education has succeeded in obtaining buildings with a combined value of \$2,583,047 during the past four years without using its tax funds, according to a report made to Governor Martin by Willard L. Marks of this city, president of the board.

In a letter of transmittal accompanying the biennial report of the system, Marks explains how the urgent need for additional building facilities at the various institutions has been partially met through the use of PWA funds with income from building fees being used to finance the loans for the board's match money.

Only \$133,000 of the 2 1/2 million dollar construction program came from state sources, according to Marks' tabulation, and of this amount, \$100,000 had been provided in contingent appropriations by the legislature some years ago, while \$33,000 came from the state's restoration fund on account of loss by fire. An additional \$376,910 was supplied through the generosity of private donors, largely for the new buildings on the medical school campus in Portland.

A tabulated list appended to the letter shows one or more new buildings for each of the six units of the system. For several years new buildings have been needed on the campuses, particularly on those where rapid increases in enrollment occurred, but there were no tax funds in the board's limited budget to care for new buildings.

Marks also reviewed the progress of the institutions in an educational way and said that a continued growth of enrollment and increased demands for services are indications of the confidence of Oregon people in their institutions of higher learning. Enrollment for the system will reach an all-time high of about 10,950 students for this college year.

The president of the board reviews briefly the annual budget recently submitted to the governor and shows that if the entire requests of the board are granted, the funds for the next two years will still be 4 1/2 per cent under the peak appropriation total for the 1929-1930 biennium, since which time the combined enrollment has increased 12
