YOUR BEST FRIEND

is your radio. Always willing to entertain you, regardless of the time of day or night that you turn it on. But, it must have good care, or something serious might happen to it. Don't wait until it stops playing or talking before you have it looked over.

Tubes should be checked at least once each year, and your set should be cleaned once each year to keep it free from metallic dust, and to make sure that all connections and soldered joints are in good condition and set properly aligned.

We have had at least 20 years experience in radio and electrical work. We repair vacuum cleaners, hair dryers, sewing machine motors, radios and all small electrical devices.

WE SELL RADIO TUBES, and also give you a close estimate of what your job will cost, free of charge, before the work is started. DON'T get the idea that your radio is worn out because it is three or four years old. We have made lots of old radios sound like new for a very reasonable charge. Bring your work in and let us give you an estimate.
