## THE "POOR SPORT" HUNTERS

This week end will again see hordes of pheasant hunters flock to this area in the annual quest of elusive Chinese Pheasants. A majority of the men and women who come are great sportsmen and lovers of the out-of-doors, who live up to the code of the great open spaces, but in every case where there are vast numbers and different types of people, there can also be found some poor sports.

This group disregards the ethics as set forth by the hunters code. He fails to leave a clean camp, shut gates, throws away lighted materials, tears down fences and shoots at practically every moving object in the hope that it might be game.

In recent years this group has gradually created an ill feeling among land owners of this section and each year sees more and more land posted forbidding hunters. This action is not taken by these land owners to horde the birds for themselves but only to protect their livestock and property. In recent years livestock has been killed and fences cut.

All sportsmen are branded by the actions of these poor sports.

The following is a full and complete classified summary of indebtedness as of September 15, 1939.

OUTSTANDING WATER BONDS \$13,000.00

I, Charles Taylor, do hereby certify that the above estimate of expenditures for the year 1940, budget allowance and expenditures for the first six months of the current year and expenditures for the year 1938, and summary of indebtedness as shown above, have been compiled from the records in my charge and to the best of my knowledge are true and correct.

(Sept. 28-Oct. 5) CHARLES TAYLOR, City Recorder, Hermiston.

"It takes 5 minutes to adjust the clutch, 15 minutes to reline it."

THE clutch on a John Deere General Purpose Tractor is in the belt pulley—and is instantly accessible. It can be adjusted in 5 minutes or less, simply by removing the cover plate and tightening three nuts. The entire job of relining can be done in 15 minutes, at a total cost of about three dollars. The John Deere clutch is the hand-operated, dry-plate type, and it picks up the load gradually and smoothly. You can operate the clutch when standing on the ground. This same accessibility and ease of adjustment on the John Deere Tractor apply to all its parts.
