The following is a full and complete classified summary of indebtedness as of September 15, 1939.				
OUTSTANDING WATER BONDS \$13,000.00				
I, Charles Taylor, do hereby certify that the above estimate of expenditures for the year 1940, budget allowance and expenditures for the first six months of the current year and expenditures for the year 1938, and summary of indebtedness as shown above, have been compiled from the records in my charge and to the best of my knowledge are true and correct.				
(Sept. 28-Oct. 5) CHARLES TAYLOR, City Recorder, Hermiston.				

"It takes 5 minutes to adjust the clutch, 15 minutes to reline it."

THE clutch on a John Deere General Purpose Tractor is in the belt pulley—and is instantly accessible. It can be adjusted in 5 minutes or less, simply by removing the cover plate and tightening three nuts. The entire job of relining can be done in 15 minutes, at a total cost of about three dollars. The John Deere clutch is the hand-operated, dry-plate type, and it picks up the load gradually and smoothly. You can operate the clutch when standing on the ground. This same accessibility and ease of adjustment on the John Deere Tractor apply to all its parts.

FEATURES
