R.E.A. HIGHLIGHTS

RAY L. WOOLLEY, Manager

The preliminary work for the Wheatline extension is practically completed. The line has been surveyed, the easements for right of way and wiring agreements are virtually completed. It is expected that these three items will be finished during the next few days. Mr. Slattery, the newly appointed administrator of the Rural Electrification Administration, has given his approval for the construction of the proposed line extensions pending the completion of these items. We feel that members of the Wheatland area will be happy to know that construction is actually beginning in the immediate future. Barring unforeseen delays, construction should actually begin during the coming week.

More good news for those members adjacent to the "B" extension now completed. The lines are ready to be energized. All stubs in this allotment will be energized just as rapidly as sufficient members have wired to make the operation feasible. At least 60 per cent of the members on each line extension should have their premises wired to permit energizing it. Each member should appoint himself a committee of one to urge those near him to get his wiring completed. In this way we will be working cooperatively to achieve the goal of electrification for the home of every member.

During the past week, the writer, W. J. Warner, and H. J. Bean, had occasion to compare our progress with that of other R.E.A. projects in the state. We found that we are noticeably ahead of them in that we have now completed our first year of operation. Furthermore, we are getting results in the form of increased members and additional consumption of electrical energy. This means that we will be able to operate more economically.

The office wishes to make the members feel that we are trying to serve their needs. For example: W. E. Finely of Pilot Rock, Ore., is in the market for a Delco system. Those of us who are planning to dispose of a Delco unit might well get in touch with him.

We have a good bit of cooperation between our organization and other interests of the community worthy of mention. Those dealers who took advantage of the opportunity to display various uses of electrical appliances and equipment at the annual meeting, cooperated. The members of the county agent's office have also been very helpful. Many of us remember the demonstration of the pig brooder put on by the 4-H club team under the direction of Mr. Knickerbocker at the annual meeting.

The latest example of cooperation with us is that of the Hermiston Herald in devoting this column to our interests, and making it possible for each of our members to receive it. In the following issues we hope to keep you informed regarding your cooperative. If we can help you by writing news of ourselves in this column and by making announcements, we will. Ask us about your electrical problems and we will endeavor to help you in the solution of them.

So, then, read this column for your own information.

ENROLLMENT PEAK OF 326 HIT AT E.O.C.E.

Enrollment figures at the Eastern Oregon College of Education released today by Miss Helen Moor, registrar, reveal that the college has hit a new peak in registration with a total of 326 on record for the fall term which opened September 25.

The highest registration figure before reached by the college was 283. This figure was recorded for the fall term of last year.

Of the 326 students registered at the college, 179 are enrolled in the teacher training division of the school and 147 are doing lower division work toward a Junior College certificate. The Junior College division of the college has expanded considerably during the past two years.

People attending EOCE from Hermiston are Robert Scrivner and Rosemary Serell.

CANNING SCHEDULE FROM October 16 to 21

8 to 11 a. m.	12 to 3:30
Mon.—No Canning	
Tues.—Fruit-Tomatoes	Beans
Wed.—No Canning	
Thurs.—Fruit-Tomatoes	Beans
Fri.—	
Sat.—Fruit-Tomatoes	Beans

Other products canned by special arrangement.

HERMISTON 4-H BOYS AWARDED MEDALS

Awards of special gold medals have been approved for the county winning 4-H team in the National 4-H dairy production demonstration contest, according to word received at the county agent's office. Members of the winning team are Robert Jackson and Joseph Cooney of Hermiston. Their demonstration was on Prevention of Horns in Cattle and they were coached by M. E. Knickerbocker, assistant county agent at Hermiston.

The Umatilla county winning team won the state contest and receives an all-expense trip provided by the Kraft-Phenix Cheese Corporation to compete in the finals at the National Dairy show at the Golden Gate Exposition in San-Francisco, October 21-25.

The eight top teams, two from each extension section, will divide \$2,800 in college scholarships and be invited to Hollywood to appear on the Kraft Music Hall program Thursday, October 26.

The purpose of the contest, conducted in cooperation with the extension service, is to provide valuable training and experience for dairy clubbers, and focus attention of dairymen on better producing methods.

LIVESTOCK PRICE FUTURE RESTS ON DEMAND FACTORS

"With production of most kinds of animal products increasing, the trend of prices will depend greatly upon the strength of domestic and foreign demand for such products," states the annual outlook report on poultry, dairy, hogs, beef cattle, and sheep just issued by the agricultural extension service at O.S.C. The report also deals with the trend of costs of feed and other farm costs which affect the net income of livestock producers.

In regard to the trend of production, data in the circular indicate further probable increases in hogs, particularly, with some increase expected in chickens and milch cows, and possibly in cattle and sheep, although rising costs for feed may have some effect on production as well as upon net income.

Demand for animal products has strengthened considerably during the past few weeks. Future trends will depend much upon the course of foreign economic and political events, as well as upon industrial and business conditions in this country, according to the report.

"Substantial gains have been made in market prices for eggs, butterfat, and wool since August 15, some of which are of normal seasonal character, and in hogs and lambs, much of which is counter-seasonal." But prices for most animal products are still relatively low, according to price data given in the report.

In addition to the outlook information on animal products, the general farm price situation and crop prospects are reviewed. With demand stronger, some improvement has occurred in the general farm price level during recent weeks, despite a gain of around 4 per cent in crop prospects during August in the country as a whole. The complete report is available free from county agricultural agents.

WHEAT LOANS MADE TO 1620 FARMERS

Federal loans on the new wheat crop have been made to 1620 Oregon farmers, according to Will Steen of Milton, chairman of the state AAA committee. These loans represent 4,500,000 bushels of wheat, and total \$2,675,000.

Wheat loan officials predict an increase in loan activity during the next few weeks, since market prices and loan values are close together and since loans taken out now will run nearly all of their full seven-months period before meeting the maturity date of April 30.

PREMIUM PRICES FOLLOW USE OF CREAM CAN TANKS

The extent to which better production methods are an aid to sound and more profitable marketing is illustrated by the installation of 125 cream cooling tanks in one community in two months this summer, says Dr. G. H. Wilster, head of the work in dairy manufacturing at Oregon State college, where a low-priced tank was designed.

"Patrons of one creamery, encouraged by its progressive manager, installed 125 cooling tanks during July and August. An immediate improvement was noticed in the quality of the cream delivered after the tanks were in use," reports Dr. Wilster.

"One farmer milking 30 cows was having difficulty in delivering cream of the highest grade. The manager recommended installing a cooling tank and offered to pay the cost of it if it did not pay for itself in a short time. The tank cost \$10.50. Well water of 51 degrees was flowed through the tank and on to stock watering troughs.

"During the two weeks before the tank was installed, 126 pounds of cream from this farm scored second grade and 93 pounds first grade. The discount on the second grade cream was \$3.78. During hotter weather after the tank was installed 147 pounds of fat were sold at 1 1/2 cents premium above first grade, and 114 pounds at 1 1/4 cents premium, or a total premium of \$3.62 above the regular first grade price."

Enough premium grade cream is now received by the creamery to make it profitable to churn it separately.

ELECTRICITY ON FARM RADIO SUBJECT

How Oregon farmers can make more and better use of electricity as service is extended to more and more rural communities will be the subject of a series of radio discussions over KOAC, the state-owned station at O.S.C. The series will be under the leadership of Everett Davis, extension specialist in agricultural engineering.

The first number in this series was broadcast October 5 and others will be heard on the first Thursday in each month for the next six months, each broadcast beginning at 7:15 p.m. Subjects arranged for the series are November 2, "Pig Brooding and Feed Grinding;" December 7, "REA Projects;" January 4, "Home Lighting and Household Electrical Appliances;" February 1, "Poultry Brooding and Lighting;" March 7, "Electric Power for Irrigation."

The series is expected to be particularly interesting in regions just now receiving electric power, such as those along the new REA line in Benton and Lincoln counties. This line, incidentally, is expected to be the first in Oregon to take Bonneville power to farms, as contracts have been completed to obtain Bonneville power from the Albany substation for this cooperative line.

KOAC TO BROADCAST BIG TURKEY SHOW

By means of one of the longest remote control hookups ever used by KOAC, the annual turkey show in Oakland, Oregon, will be broadcast over the state-owned station on the campus of Oregon State college, announces E. F. Strong, president of the Northwestern Turkey Breeders' association. KOAC will make two broadcasts from the show on December 15.

The annual Oakland Turkey show is nationally recognized as the outstanding show of its kind. Mr. Strong expressed satisfaction over the arrangements with KOAC, which will permit thousands who cannot attend the show to participate to that extent.

From 2:30 to 3 o'clock on December 15, KOAC will broadcast views of official judges on their placings. The judges will also tell what the turkey industry is demanding of the grower. The annual banquet that evening will be broadcast from 8 to 9 o'clock. The principal speaker will be Governor Charles A. Sprague. Leaders in the turkey industry and other prominent men in the state will also be heard on this broadcast.
