**GARDEN CLUB CHATS**

The next meeting of the Garden Club will be held on November 6th, instead of November 3rd, as planned. This change of the meeting date was necessitated because the speaker had been arranged for under the old date schedule. On this day, November 6th, the club will give a silver tea at the library at 2:00 o'clock, and will have as a special guest speaker, Mrs. Earl Thompson, president of the Pendleton Garden Club. Mrs. Thompson's topic will be Chrysanthemums. Members are requested to bring chrysanthemums in containers to the meeting for display. The mums will be sold at the close of the tea.

Right now while we are enjoying the brilliant colors of the autumn

foliage is a good time to plan for color in our own gardens. One reason why the autumn colors are such a joy is that the display comes when most of the flowers are gone and when lawns, fields and gardens have taken on a withered look. At this time plants whose foliage turns color are the difference between an interesting vista and one that is drab and uninteresting. Remember when planning an autumn display that the brilliant colors may be dramatized by placing nearby a plant or shrub whose foliage will stay green, thus forming a decided contrast.

We just came across this poem of Edna St. Vincent Millay's, and because it is so beautiful and so timely we quote it:

When the poppies in the garden bleed,  
And the coreopsis goes to seed,  
And pansies, blossoming past their prime,

Grow smaller and smaller all the time,  
And when on the mown field, shrunk and dry,  
Brown dock and purple thistle lie,  
And smoke from forest fires at noon,  
Can make the sun appear the moon,  
When apple seeds all white before,  
Begin to darken in the core,  
I know that Summer, scarcely here,  
Is gone until another year.
