## Oregon Draws Wheat Leaders

Wheat was the common interest of those who attended the 12th annual convention of the Eastern Oregon Wheat League held recently at Condon, Oregon. Upper picture, C. K. Barker (left), Condon farmer elected wheat league president, is congratulated by R. M. Evans, national AAA administrator. Lower picture, John Conway (left), farmer of Leeds, N. D., receives from N. E. Dodd, western region AAA director, the trophy awarded his county by the wheat league for best compliance in 1939 with the national wheat program. Evans, principal convention speaker, said America's farm program is superior to that of any other nation in the world.

"It takes 5 minutes to adjust the clutch, 15 minutes to reline it."

THE clutch on a John Deere General Purpose Tractor is in the belt pulley—and is instantly accessible. It can be adjusted in 5 minutes or less, simply by removing the cover plate and tightening three nuts. The entire job of relining can be done in 15 minutes, at a total cost of about three dollars. The John Deere clutch is the hand-operated, dry-plate type, and it picks up the load gradually and smoothly. You can operate the clutch when standing on the ground. This same accessibility and ease of adjustment on the John Deere Tractor apply to all its parts.
