

# FARM CO-OPERATIVE DIVISION

A MESSAGE TO EVERY MEMBER.

## R.E.A. HIGHLIGHTS

We are taking stock of our conveniences and use of electricity now, and in order to make it simpler and better we are going to ask you to take part in this inventory.

When your January statement is mailed to you on the first day of February, there will be enclosed with it a small card. On one side of it you will note that it is stamped and addressed back to this office. On the opposite side is the heading, "Adequate Service Survey," followed by a small explanatory note on how to mark the card. You will note that this side of the card is divided into three sections, household electric, household plumbing, and farm electric. As soon as you receive this card, check in the little square opposite the items which you have at present. If you have one not listed note at the bottom what it is.

Last, but most important, MAIL it immediately. DO NOT leave it until LATER.

There is also another card coming out in the next few days—your meter reading card. One party sent in his meter reading card last month after all the bills were out, about the 10th of the month, with the notation, "Delayed due to Christmas rush." If your card is not in by the last day of the month it makes it necessary for YOUR cooperative to spend money and time to come out and read YOUR meter in order that the proper procedure may be carried on. So it does not do any good to read it later and send it in because we will have read it already. Remember! Read your meter the day the card comes and put in into the mail immediately.

We are making this a successful method of operation and the large majority are reading their meters very satisfactorily. Those who have been getting their card in, need not feel that they too are being criticized. However, those who have read theirs properly might see that their neighbor sends the card in too and in that way we can eliminate the few who have failed to read their meters.

We are progressing and making our project more stable each day. Last week we connected the fourth member and there are still others to be connected as soon as we can make the proper arrangements.

Mr. and Mrs. Neva Bedwell visited her parents, Mr. and Mrs. Emery Bedwell Saturday night.

The game played by the Comets with the Boardman team last Thursday night closed with a score of 11 to 18 in Irrigon's favor.

## Record Enrollment Continues.

Oregon State College—The moderate increase in registration over a year ago which occurred last fall was continued into the winter term at O. S. C. Early registration after the holidays exceeded that of last year and assured a new high record for the second term at about 4500, said Registrar E. B. Lemon. Totals before the end of the first week were 4270 with many graduate students and others still to enroll.

## WESTLAND GRANGE HAS AUCTION

Highlight of the last meeting of the Westland Grange was an auction of discarded garments, and a beauty parade in which members displayed the various worn out garments they had purchased. The stunt was arranged by the lecturer, Mrs. Margaret Seeliger, and "Colonel" H. R. Hartley presided as auctioneer. Frank Seeliger, attired in feminine garments, was awarded the prize as the best dressed individual.

It was decided that the next meeting of the Grange, January 25, would be in the form of a social evening for Grangers and their families. Cards and Chinese checkers will be played, and other entertainment is being planned.

Thirty members and one visitor, Sydney Power of Stanfield Grange, were present. It was announced that Grange members would be entertained by members of the Home Economics club at the home of Mr. and Mrs. P. A. Power the evening of Saturday, January 20.

## Columbia Grange Plans Pie Social

"It takes 5 minutes to adjust the clutch, 15 minutes to reline it."

THE clutch on a John Deere General Purpose Tractor is in the belt pulley—and is instantly accessible. It can be adjusted in 5 minutes or less, simply by removing the cover plate and tightening three nuts. The entire job of relining can be done in 15 minutes, at a total cost of about three dollars. The John Deere clutch is the hand-operated, dry-plate type, and it picks up the load gradually and smoothly. You can operate the clutch when standing on the ground. This same accessibility and ease of adjustment on the John Deere Tractor apply to all its parts.

### FEATURES

- Simple, rugged, two-cylinder engine
- Designed to burn low-cost fuels with outstanding economy
- Thermo-siphon temperature control
- Belt pulley on the crankshaft—full engine power to belt
- Rear wheels adjustable from 56 to 84 inches
- Hydraulic power lift.
