PRESTON AND LAMOUR TEAMED

A mounting succession of tremendous tidal waves that finally crest fifty feet, roar in the devastating climax of the tropical hurricane that bursts as nature's trump card in Paramount's blazing technicolor production, "Typhoon," with Dorothy Lamour in her most glowing role, which will be seen Saturday, August 31, at the Oasis theatre. All the dazzling color of a South Sea Island is brought to life in this technical triumph.

The story circles about the breathtaking romance of Dorothy and Robert Preston, who abandons ship on the island where Dorothy was castaway ten years before. Adventurous suspense is supplied by J. Carrol Naish, in the role of mutineer, and plenty of comedy is supplied by Dorothy's trained chimpanzee, and Preston's shipmate, Lynne Overman.

# HAMMER MILLS

These mills have gained popularity deserving of their performance.

First the initial cost is less than other mills of same capacity.

Second, you have to really see one of these mills, examine it thoroughly, see the material and workmanship, and then see it run and check on its work.

John Deere now has three sizes in these mills. A size for every job and every purse.

The percentage of gain in ground feeds is far greater than feeds not ground or chopped.

This advantage plus the savings in feed, makes the purchase of one of these mills pay for itself.

We are planning a public demonstration of all three sizes in this community. Watch for dates and location.
