John Deere Tractors Have Low Fuel Cost

Model H Tractor will operate with maximum fuel cost of 7c per hour.

Model B Tractor with a maximum of 9c per hour.

Model A Tractor with a maximum of 12c per hour.

Compare these figures when thinking of the purchase of a tractor, as they are vitally important to you, during the years you expect to use the machine.

The purchase of a tractor is a major transaction and after it is made, you expect work, and plenty of hard work from your tractor, but if fuel and maintenance costs are too high, then it becomes a non-profitable operation and you do not realize your full dividend from a major investment, which the purchase of a tractor really is.

In other words if you have to pay two dollars or more per day for tractor fuel then you are just trading even for tractor power and are not realizing any benefits from owning your tractor.

Just call us for a demonstration and let us prove these facts.

LAW OFFICERS TO USE AIRPLANES

A special flying squad of law enforcement officers in plain clothes and an airplane to spot violators are being used to augment the regular force of state police during the present hunting season.

The men who have been selected from the field personnel of the Oregon State Game commission are working directly under Frank B. Wire, state game supervisor, and will be shifted throughout the state, perhaps working one week in one section and the next in another.

The airplane will carry an officer in addition to the pilot who will be equipped with a two-way radio set.

If poachers shooting pheasants are spotted, the officers in the plane will communicate location of such violators to officers in automobiles on the road.

"The aim of the game commission is to prevent law violations," said Mr. Wire. "More effective patrol

work can be done, we believe, through officers working in the same type of clothes worn by the hunters. Many of the regular state officers are working in plain clothes this year, too."
