OUR DEMOCRACY

TAKING CARE OF GRANDPA.

IN ANCIENT TIMES, THE FEW WHO LIVED TO GROW OLD AND USELESS, WERE DRIVEN OFF TO STARVE.

OLD AGE IS INCREASING. NUMBER OF PERSONS 65 AND OVER IN U.S. HAS NEARLY DOUBLED IN 20 YEARS, BUT—

TODAY WE LOOK FORWARD TO OLD AGE SECURITY. U.S. AND STATE LAWS PROVIDE MINIMUM SUBSISTENCE. 1,500,000 ANNUITIES HAVE BEEN BOUGHT THAT WILL PAY MORE THAN A HALF BILLION YEARLY.

POWER COSTS take NOSE DIVE

JOHN DEERE TRACTORS

JOHN DEERE Two-Cylinder Tractors, burning low-cost fuels successfully and efficiently, are sending power costs down to new low levels in all sections of the country.

Users are reporting amazing savings on low-cost fuel alone. For instance, many are operating their John Deere Model "H" tractors for as little as 2 cents an acre in cultivating.

Measuring fuel economy on a dollars and cents basis—the way it should be measured—impartial tests show that five different makes of tractors using low-grade gasoline do only 71.6% as much work as a John Deere Tractor with \$1.00 worth of low-cost fuel, and that nine other makes burning regular gasoline do only 66.6% as much work as a John Deere on \$1.00 worth of low-cost fuel.

These impartial tests furnish convincing proof that your fuel dollar goes farther in a John Deere. Come in and make us prove it.

From Veil to Shorts Go Turkish Girls

Fifty years have taken Turkish women far, all the way from the veil to shorts. Recently the American Girls College of Istanbul celebrated its half century anniversary of turning out Americanized versions of Turkish young women. Although there were only two Turkish girls in the first graduating class, the numbers have increased since the advent of the Turkish republic and the recognition of women's rights until 90 per cent of the college is Turkish.

The leading Turkish families are eager for their daughters to have American educations. But even though the students appear in brief white shorts and bare legs for gym classes—a far cry from the days when they had to be veiled for commencement—the Turkish government and national customs tend to lessen the Americanization process.

Even though "Gone With the Wind" is the Turkish students' favorite reading matter and pictures of Clark Gable and Tyrone Power decorate her room, she does not entertain men at college proms. The ministry of education prohibits boys and girls dancing together within the college walls.

Although the Turkish collegian speaks good English and studies with many of the same books as her American counterpart, she doesn't wear makeup, doesn't like to eat between meals, has never heard of a "coke" or "jitterbug" and prefers tango to swing. She'd rather go to the movies than to a dance and only drinks alcoholic beverages at a ball or a wedding.

Boys aren't allowed to call at the college, so the dean isn't bothered with the ever-present American problem of getting in parked cars because the average Turkish youth doesn't own one, there being but 5,000 in all Turkey.

Although new vistas have been widely opened to women in the last two decades of Turkish history, the average student prefers marriage to a career. None looks forward to a movie or stage career because that still "isn't the thing to do." Although she gets her fashion ideas from the American movies, she isn't as susceptible to fads as American girls and her sweaters and skirts have more individuality than those found on American campuses.

She chooses her own clothes but doesn't have an allowance. She likes sophisticated clothes rather than casual sports things; wears her hair in a long glamour-girl bob, favors snoods and costume jewelry.

Antarctica Will Become Tropical, Predicts Byrd

Millions of years ago Antarctica had a tropical climate, according to Adm. Richard E. Byrd, the famous explorer.

The climate, moreover, is changing, he says, and that region again will become habitable.

But don't make any rush for Little America as yet. It will take some millions of years, Byrd declares, till it's warm enough for you.

Byrd brought back from his recent expedition geological and botanical fossils of wood and leaves to prove the antarctic once was tropical. He said fossil animals might be found if the polar ice cap could be excavated. However, he said it was not possible to prove human existence there.

The far southern continent is passing through a glacial age and the ice is slowly diminishing, Byrd declared. Shepherds in Chilean Patagonia had told him, too, that the ice and snow was less now than a generation ago, he added.

As the ice diminishes in Antarctica, Byrd said, the temperature will gradually rise through the centuries and possibly the currents which give sub-tropical Chile and Peru their temperate climate will become warmer.

Protect Civil War Trenches

To serve the twofold purpose of beautification and prevention of erosion which threaten to damage Civil War trenches, thousands of blossoming periwinkle were planted in the Fredericksburg-Spotylvania National Military park.

Since the matted of underbrush, which for more than 80 years held the earth in place and made a wilderness of the historic battlefields, has been removed, national park service officials have been combating the menace of erosion.

Branch Spalding, co-ordinating superintendent of the Virginia battlefields, said the periwinkle was a little evergreen that produces tiny white blossoms in late April. Mr. Spalding said that through the co-operation of park neighbors, hundreds of roots were gathered for planting.

Treasury Gadget

Stretched across the top of the tellers' windows of the state treasurer's office in Springfield, Ill., are many strands of wire which look like radio aerials.

Ed Lonergan, press agent for Treasurer Louie E. Lewis, explains they are part of a robbery-burglary system, charged with high voltage to prevent climbing into the treasury office and fixed to set off alarms in police stations.

Cost of the system is \$2,600 and it saves \$4,000 annually on theft insurance. Little money is kept in the office, but there are many bonds burglars might yen for.

UMATILLA NEWS

By Mrs. Glenn Ostrom

Mae Wurster spent Thursday and Friday forenoon in La Grande where she visited Doris Rodenbough, who is attending Draper School of Beauty. She was accompanied by Mrs. V. D. Bramer and daughter Stella Rae, who visited Mr. Bramer, who is employed in La Grande.

TROUBLES NEVER COME SINGLY...
nor can you tell what kind of trouble may come next.

You may have plenty of fire insurance on your house but that does not cover the loss if your automobile burns up. Automobile liability insurance protects you against damage suits arising from injuries to other people, but it does not pay the bills for the injuries you may suffer in the same accident.

Why not come in and let us go over your insurance program with you? This agency is fully prepared to give expert advice on the subject.

FIRST NATIONAL BANK OF HERMISTON

F. B. SWAYZE, President

Member Federal Deposit Insurance Corporation

Mrs. Arnold, Mrs. Rudy and Mrs. Jack Kester motored to Portland Thursday, returning Saturday.

Betty McKenzie, who has been in nurses training in Pendleton for the past three years, returned to her home Tuesday afternoon to spend a few days. She has completed her course.
