## POWER COSTS take NOSE DIVE

with JOHN DEERE TRACTORS

JOHN DEERE Two-Cylinder Tractors, burning low-cost fuels successfully and efficiently, are sending power costs down to new low levels in all sections of the country. Users are reporting amazing savings on low-cost fuel alone. For instance, many are operating their John Deere Model "H" tractors for as little as 2 cents an acre in cultivating. Measuring fuel economy on a dollars and cents basis—the way it should be measured—impartial tests show that five different makes of tractors using low-grade gasoline do only 71.6% as much work as a John Deere Tractor with \$1.00 worth of low-cost fuel, and that nine other makes burning regular gasoline do only 66.6% as much work as a John Deere on \$1.00 worth of low-cost fuel. These impartial tests furnish convincing proof that your fuel dollar goes farther in a John Deere. Come in and make us prove it.
