COUNTY MEETINGS ON FARM OUTLOOK, DEFENCE, BILLED

(Continued from Page 1)

following three subjects:
1. To study past recommendations in the light of changing world conditions.

2. To recommend such further adjustments in the county's agriculture and in conditions affecting farm home and rural life as seen desirable.

3. To consider the contribution which rural people can make toward national preparedness.

A trial program of this nature has already been held in Deschutes county where 30 farm and home leaders considered these questions and arrived at recommendations on the best agricultural adjustments in view of present world affairs, and on proposed steps to reduce to a minimum the problems of readjustments to follow the present war.

The plan is to hold an opening all-day meeting of the general group in each county to hear reports on progress since 1938, and an outline of present conditions and outlook. Plans will be considered there for meetings to be held by the separate committees, and for getting final recommendations to the public, possibly through community meetings.

The schedule for Umatilla county calls for the first meeting to be held February 6 with E. R. Jackman, farm crops specialist, and Art King, soils specialist, assisting the local extension staff and the county farm and home leaders.
