DESIRABLE ROSES LISTED BY O.S.C. FOR HOME GARDENERS

In selecting roses for the home garden, Oregon growers have an unusually wide range of choice, as nearly all sorts do well in this country. From the many hundreds of varieties available, P. W. Miller, a plant pathologist at Oregon State college and a home gardener himself, has made a selection of varieties he considers best from the standpoint of the following desirable characteristics: perfection of bud and flower form, disease-resistant foliage, vigor, free-flowering habit, color stability, good cutting qualities, hardiness, and fragrance.

While all of these qualities will not be combined in any one variety, this list most nearly approaches them in Miller's opinion.

UNCLAIMED DEER HIDES TO BE SOLD

A new plan for handling unclaimed deer and elk hides held by cold storage and locker plants of the state has been announced by the Oregon State Game Commission.

Instead of destroying the hides, the various plants will ship hides to the Portland office for sale to the highest bidder. One-half of the net proceeds will be returned to the plants to reimburse them for handling the skins. Before shipment is made, the plants will first notify the commis-

sion office of the number of hides on hand and state police officers will then check and tag the hides before shipping.

In announcing the new plan, the game commission makes it clear that any individual has the right to claim the hide of a deer or elk he has killed legally and if properly tagged, he may have it tanned and made up into articles of clothing. No individual has the right, however, to sell or barter such hides.

GARDEN CLUB CHATS

by Mrs. Vera Doyle

The regular Garden Club meeting will be held this Friday at 2:30, January 10, in the Hermiston library. A horticultural questionnaire will be presented to the club members by our program chairman, Mr. J. Gimbel. The questions will give us an opportunity to learn about evergreens, shrubs, vines, annuals, perennials, ferns, bulbs, and wild flowers. After a general discussion by the members, the correct answers will be given.

January 10, at 1:45 p. m., radio station K.U.J. Walla Walla will broadcast a program about "Quiet Nooks for the Birds of the Garden." This is the regular radio club meeting program. It will also include Mrs. D. Heffner's special topic on flower show judging. "Balance in Flower Arrangements" will be discussed.

ENFORCEMENT OF BUTTER LAW MADE

The license of one Oregon creamery entitling it to use of the state Grade A emblem on its butter was revoked as result of six hearings held by the state department of agriculture in December.

A decision has not been handed down in the other five cases. These hearings were called after it was found that butter from the six creameries which was labeled Grade A did not meet requirements of state Grade

WHAT IS MEANT BY DEPENDABLE PROTECTION

AN insurance policy that is backed by only a minimum of quick assets cannot give you 100% protection against financial loss. CAPITAL STOCK COMPANY FIRE INSURANCE is recognized as the most dependable form of insurance because it provides sound protection at a fixed known-in-advance cost, because its policies are backed not only by legal premium reserves but also by cash capital and surplus, because it operates through authorized citizens of your own community, Local Agents who are always available to render prompt personal service.

Four out of five people choose capital stock company fire insurance in preference to other types. You, too, want insurance that protects you against community-wide catastrophes. That is the kind you should have on your home, business, automobile and other property. That is the kind of dependable insurance we sell. Consult us on any insurance problem.

IF YOU WANT TO CUT DOWN OPERATING COSTS;
IF YOU WANT TO RECEIVE JOHN DEERE SERVICE, AND MAKE AVAILABLE TO YOURSELF LOW COST PARTS SERVICE,

THEN—

You should investigate these John Deere tractors, BEFORE you buy a tractor and not afterwards.

The fellow who owns a John Deere tractor has a satisfied feeling that he has one of the lowest cost operating tractors in the wheel tractor field.

He is not confronted with the fact, when he goes to buy extra equipment; that he can't get it or if it is available, it is costly.

Neither does he "kick himself" afterwards and say "Gosh, I wish I had investigated tractors a little more before I bought."

The John Deere tractor will plow, mow, cultivate, level, harrow or seed an acre of ground cheaper than any other wheel tractor on the market today.

Make us prove this statement with a demonstration. We'll let you or anyone else do the judging.
