GARDEN CLUB CHATS

by Mrs. Vera Doyle
 There's more than a little garden-pampering going on just now, round about Washington state, as the days are getting closer to the National Flower Garden show.
 This show will take place in Seattle, Wn., March 23 to 30 on both levels of the Seattle Civic auditorium, with 1,000 feet reserved for garden club entries alone. There will be an admission charge to see the show.
 The garden club section as plans now stand, with space allotted and diagrammed, will be in three big gardens. None of the ladies are disclosing their plans except to say their garden may be "a bit of a surprise."
 Rhododendrons, primroses and other spring flowers will be featured depending upon nature and certain elements.
 One section of the garden exhibit which is causing a tremendous amount of interest is the amateur decorative division, Mrs. L. Houston Reusch and Mrs. Gladys Packhurst.

co-chairman. There will be 160 niches, some horizontal, some vertical, for flower arrangements, with smaller niches for miniatures.

Entries in this class are statewide and will be made in the following classes: Northwest, modern, striking contrasts, moods, international, humorous, patriotic and miniatures.

Mrs. Reusch said the Northwest class is proving decidedly popular, using "every symbol of the region—shells, barnacles, driftwood, lush native evergreen sprigs, rocks, Eastern Washington "sagebrush", and so on. The entire garden club section is non-competitive and non-professional.

There will be twelve full-scale gardens, perfectly proportional, all different, all coordinated, and landscaped and beflowered to delight every home owner. There will be pools and fountains, garden walks and woodland paths.

Dr. John H. Hanley is co-chairman of the local executive committee for the show.

You can have grass so thick it chokes out weeds!

Grass becomes active earlier in the spring than weeds. If you'll give your grass a square meal, even before the frost is out of the ground, it will get such a thriving head start that weeds will find little room to grow.

But the kind of dense, heavy turf that chokes out weeds results only from feeding with a complete plant-food like Vigoro. Your grass needs eleven different food elements from the soil. Use Vigoro to make sure all eleven are supplied in balanced proportions.

For the very best from plant food on your lawn, remember to...

FEED WITH VIGORO NOW!

Even before frost is out of the ground... **NOW!**
