Mr. and Mrs. Truman Messenger of Meacham were visiting relatives here over the week end.
Rev. Walpole attended Presbytery in Baker last week.
A missionary meeting was held at the home of Mrs. John Fisher Wednesday afternoon. Ten ladies were present.

**Lemon Is Versatile
And Extremely Useful**

Versatile—that's the lemon, a first aid to the housekeeper in dozens of different ways.
Besides the delicious dishes made from this fruit and the flavor it contributes as a garnish, it has a multitude of household uses.
Lemon juice is an invaluable health asset to those who make its use a regular practice. For hair and complexion it is one of milady's foremost beauty aids.
Do you make the most of lemon to bring out flavor in other foods? A plate of lemon quarters may very well take its place on the table along with the salt and pepper shakers.
The Russian custom of serving lemon with tea is now universally accepted. Since many guests prefer lemon with this beverage, the thoughtful hostess will always include a plate of lemon slices and quarters.
Cloves may be inserted in the lemon for a decorative touch. Iced tea, in particular, calls for generous additions of lemon.
And, believe it or not, there's nothing like lemon juice to bring out the full flavor of melon.
Fresh fruits, such as bananas, apples, avocados, peaches and pears, used for salads, may be kept light in color and are improved in flavor by covering or sprinkling with lemon juice.
Add a little lemon juice to water in which lettuce or other salad greens are freshened. It will revive and crisp them.

UMATILLA NEWS
By Mrs. Glenn Ostrom

ELECTRIC RATES CUT AGAIN!

**\$410,000 SLASHED OFF ELECTRIC BILLS...
Effective May 22**

**PACIFIC POWER & LIGHT
COMPANY CUSTOMERS
NOW SAVE \$1,300,000 A
YEAR BY THIS AND OTHER
RATE CUTS SINCE 1936**

* * * *

● Your low electric rates are to be lower still. For on May 22 another in the series of Pacific Power & Light

Co. rate reductions goes into effect. All home, farm, commercial and power customers will benefit by this latest cut in the price of electricity. *Minimum bills for rural customers have been cut from \$1.50 to 95c a month. Minimum bills for city homes have been reduced 15% to 25%. In addition, prices on all quantities of electricity—large or small—have been greatly reduced.*

PROGRESS

This latest reduction in your electric rates is another step in Pacific Power & Light Company's long-established policy of cutting the price of electricity as it increases its volume of business and the efficiency of service. Savings that we have made are now passed on to you . . . just as they have been in the past, and will be in the future.

Residential Rates for Hermiston, Umatilla, Echo and Stanfield will be:

First 12 kilowatt-hours or less per month	85c
Next 48 kilowatt-hours	4.2c
Next 140 kilowatt-hours	2.5c
Excess kilowatt-hours	1.5c

An optional block of 500 kilowatt-hours at only 7 mills per kwh is available for automatic water heating under single-meter service. The present 8-mill rate for separately-metered heaters also will continue to be available.

New Commercial Rates

First 14 kilowatt-hours or less per month	\$1
Next 386 kilowatt-hours	4.6c
Next 600 kilowatt-hours	3.5c
Next 1000 kilowatt-hours	2.5c
All excess kilowatt-hours	2c

**Now you get
MORE ELECTRICITY FOR NO MORE MONEY!**

● Without paying a cent more, you'll now get more electricity. The amount you get depends on your present use. But in any case you'll get enough extra kilowatt-hours

to operate at least one such an appliance as a toaster, waffle iron, clock, lamp, etc.

But perhaps you've always wanted an electric range, refrigerator or water heater. Then why not let your extra electricity apply on the operation of one of these major appliances. What additional electricity you'll need won't cost much, for Pacific Power & Light Company rates are now extra low.

ASK ANY DEALER OR PACIFIC POWER & LIGHT COMPANY WHAT THE RATE REDUCTION MEANS TO YOU IN TERMS OF BETTER LIVING!

PACIFIC POWER & LIGHT COMPANY
Always at Your Service

**Nursery School for Deer
Set Up in North Carolina**

A nursery school for deer, holding classes from June to October, has been established in the 100,000-acre Pisgah National Forest Game refuge, about 30 miles from Asheville, N. C.
The fawn station was set up because this national forest is overstocked with Virginia white-tailed deer, and they had foraged tree seedlings until forest growth was endangered. Now forest service men segregate the newborn fawns and raise them "by hand" until they are old enough to be returned to the wilds.
The course of the newborn fawn's life in the plant is as carefully supervised as that of the baby in maternity hospital. Each little fawn has its own chart, which records periodically its weight, temperature and general condition. It is fed from an ordinary baby bottle with rubber nipple.
In addition to thinning out the deer by the fawn-farm method, the five or six thousand deer on the Pisgah game preserve is further diminished through the use of 160 deer traps. Placed by the roadside to facilitate the transportation of the adult deer by truck to other homes, these apple-baited humane traps capture the animals uninjured.

Equal to Stradivari

After eight years of research in his Harvard university physics laboratory, Dr. Frederick A. Saunders decided that a good American violin costing no more than \$200 was the equal in tonal quality of a \$50,000 instrument made two centuries ago by Antonio Stradivari. Recently he decided to test his theory before an audience of 170—including musicians and music critics—at the Franklin Institute of Philadelphia.
Behind a screen, a violinist played a violin made in Philadelphia a few months ago, another made in Germany a few years ago and a third, made by Stradivari, 200 years ago. Of the 170 listeners, only 47 picked out the Stradivari.
Concluded Dr. Saunders: "The fine old instruments—the Strads and the Guarnerii—require only half as much work to produce a good tone. They are, therefore, more responsive—important to players working at the limit of their abilities. But for the listener, there is no difference."

Powerful Antiseptic

A small amount of chlorine concentration—100 parts per million water—will lessen to a great degree the bacteria germ left on utensils in both the home and public restaurants, according to a bacteriologic survey of public places recently made.

It was found that many bacteria are left on eating utensils in both the home and restaurant, despite a thorough cleaning. The report states, however, that they can do but little harm.

While many persons dislike the taste of chlorine in water, medical men say that it has been proved over and over again that in the concentration form, chlorine is harmless and at the same time valuable in the preventing of epidemics of food infection.

More Careful Now

Love has made radio amateurs more careful in their choice of language. For years "hams" addressed each other as "OM" (old man) and when there was need to refer to one's wife she was the "OW" (old woman). But unmarried young chaps when they got a girl naturally called her the "YL" (young lady). And when they married, love just couldn't see referring to the "YL" as the "OW" so soon, so new wives were called "XYL." And now all "old women" are referred to on the air as "ex-young ladies."
